This MSc provides participants with a theoretical understanding of research questions and methodologies in the study of past human-environment interactions, including subsistence and subsistence change. The Institute of Archaeology has a long research and training tradition in environmental archaeology, and through the years has developed well-established laboratory facilities and reference collections.

**Degree summary**

Students gain practical experience in laboratory analysis of at least one of either: identification of animal bones, identification of plant macro-remains, sedimentological analyses. They develop an understanding of stratigraphic formation processes and their implications for developing sampling strategies, and are trained to collect and analyse data and report scientific results.

- The UCL Institute of Archaeology is the largest and most diverse department of archaeology in the UK, and provides a stimulating environment for postgraduate study.
- The institute boasts a wide range of laboratory facilities relevant to this degree including dedicated laboratories for zooarchaeology (with a comparative collection of Near Eastern and European faunal remains), archaeobotany (with extensive comparative collections for Old World seeds, wood, tubers, phytoliths and pollen); phytolith processing, sedimentology and scanning electron microscopy.
- UCL is located in central London, close to the resources of the British Museum, the British Library and the Natural History Museum.

The programme is delivered through a combination of lectures, seminars, presentations, laboratory sessions, practicals, and site and museum visits. Assessment is through the dissertation, and a combination of essays, coursework, presentations, practical examination and laboratory reports, depending on the options selected.

**Degree structure**

**Mode:** Full-time: 1 year; Part-time: 2 years  
**Location:** London, Bloomsbury  

Students undertake modules to the value of 180 credits of which the dissertation is 90 credits (50% of the degree). The programme consists of three core modules (45 credits), optional modules (45 credits) and a research dissertation (90 credits).

**CORE MODULES**

- Students are required to take the following:
  - Environmental Archaeology in Practice
  - Resources and Subsistence

**OPTIONAL MODULES**

- Archaeology of the Late Pleistocene and Holocene Hunter Gatherers
- British and European Prehistory: Neolithic to Iron Age
- Funerary Archaeology
- Middle Bronze Age to the Iron Age in the Near East: City-States and Empires
- The Aegean from First Farmers to Minoan States
- The Mediterranean World in the Iron Age
- The Neolithic and Early Bronze Age of the Near East: The emergence of villages and urban societies

**DISSERTATION/REPORT**

- All students undertake an independent research project, normally based on practical laboratory-based research, which culminates in a dissertation of 15,000 words.
Your career

Some graduates of the programme go on to PhD studies but others will be well-placed to pursue a wide range of professional careers both within and beyond archaeology, including employment as environmental specialists for contract archaeology units.
Entry requirements

A minimum of an upper second-class Bachelor's degree in a relevant subject from a UK university or an overseas qualification of an equivalent standard.

English language proficiency level

If your education has not been conducted in the English language, you will be expected to demonstrate evidence of an adequate level of English proficiency.

The level of English language proficiency for this programme is: Good.

Information about the evidence required, acceptable qualifications and test providers is provided at: www.ucl.ac.uk/graduate/english-requirements

Your application

Students are advised to apply as early as possible due to competition for places. Those applying for scholarship funding (particularly overseas applicants) should take note of application deadlines.

When we assess your application we would like to learn:

// why you want to study Environmental Archaeology at graduate level
// why you want to study Environmental Archaeology at UCL
// what particularly attracts you to this programme
// how your personal, academic and professional background meets the demands of a challenging academic environment
// where you would like to go professionally with your degree

Together with essential academic requirements, the personal statement is your opportunity to illustrate whether your reasons for applying to this programme match what the programme will deliver.

FEES AND FUNDING 2017/18 ENTRY

// UK: £10,110 (FT), £5,085 (PT)
// EU: £10,110 (FT), £5,085 (PT)
// Overseas: £20,540 (FT), £10,430 (PT)

The tuition fees shown are for the year indicated above. Fees for subsequent years may increase or otherwise vary. Further information on fee status, fee increases and the fee schedule can be viewed on the UCL Current Students website.

Institute of Archaeology Master's Awards: A small number of grants of £1,000 are available for the academic year 2017/18. All UK/EU and Overseas fee paying students with an offer to start any Master's degree offered by the IoA are eligible to apply. For an application form please email Lisa Daniel. The deadline for applications is 1 March 2017.

Full details of funding opportunities can be found on the UCL Scholarships website: www.ucl.ac.uk/scholarships

APPLICATION DEADLINE

All applicants: 28 July 2017

Details on how to apply are available on the website at: www.ucl.ac.uk/graduate/apply
