Pharmaceutics is the science of medicine design. This MSc was introduced in direct response to the requirements of the pharmaceutical industry for highly skilled formulation scientists capable of taking promising new drug candidates and developing them into world-class medicines. Graduates of this programme are highly competitive in the global jobs market.

**Degree summary**

This programme provides education in the science of successful medicine design, development and manufacture and students acquire the key skills needed to pursue a career in industrial product development or a research career in the design of drug delivery systems. Particular emphasis is placed on developing research skills.

- The research project, perhaps the most exciting aspect of this programme, now lasts seven months. During this period you will join the research of one of our world-leading academics, pursuing research that will advance the progress of contemporary medicine design.
- Our close links with the UK pharma industry mean we can arrange careers days and other networking opportunities where you will have direct access to potential employers.
- We have introduced elements to the programme which will provide evidence of continuing professional development and increase your employability. These include building a portfolio of practical and analytical skills, and classes to develop your key skills in communication, calculations, and IT.

The programme is delivered through a combination of lectures, tutorials and seminars as well as industrial visits. Assessment is through a combination of written examinations, coursework assignments and a research project.

**Degree structure**

Mode: Full-time: 1 year  
Location: London, Bloomsbury  
Students undertake modules to the value of 180 credits. The programme consists of five core modules (75 credits), optional modules (45 credits) and a research dissertation (60 credits).

**CORE MODULES**
- Analysis and Quality Control
- Preformulation
- Formulation of Small Molecules
- Personalised Medicine
- Pharmaceutical Biotechnology

**OPTIONAL MODULES**
- Clinical Pharmaceutics
- Nanomedicine
- Formulation of Natural Products and Cosmeceuticals
- Initiating a Pharmaceutical Start-Up

**DISSERTATION/REPORT**
- All students undertake a research project which is the major component of this MSc programme and culminates in a written dissertation and oral presentation.
Your career

Graduates of this programme progress on to careers in the various aspects of the pharmaceutical and biotechnology industries including research, product development and manufacturing, clinical trials and regulatory affairs. Others pursue a PhD in the UK or overseas.
**Entry requirements**

A second-class UK Bachelor’s degree or higher in pharmacy, pharmaceutical science, physical science, chemistry, chemical engineering, materials science, biotechnology, pharmaceutics or a related field in the life or physical sciences, or an overseas qualification of an equivalent standard is required.

**English language proficiency level**

If your education has not been conducted in the English language, you will be expected to demonstrate evidence of an adequate level of English proficiency.

The level of English language proficiency for this programme is: Good.

Information about the evidence required, acceptable qualifications and test providers is provided at: www.ucl.ac.uk/graduate/english-requirements

**Your application**

Students are advised to apply as early as possible due to competition for places. Those applying for scholarship funding (particularly overseas applicants) should take note of application deadlines.

When we assess your application we would like to learn:

- how your academic and professional background meets the demands of Pharmaceutics
- why you want to study Pharmaceutics at graduate level
- what particularly attracts you to this programme at the UCL School of Pharmacy
- where you would like to go professionally with your degree and how this programme meets these needs

Together with essential academic requirements, the personal statement is your opportunity to illustrate whether your reasons for applying to this programme match what the programme will deliver.

**FEES AND FUNDING 2017/18 ENTRY**

- UK: £12,950 (FT)
- EU: £12,950 (FT)
- Overseas: £25,130 (FT)

The tuition fees shown are for the year indicated above. Fees for subsequent years may increase or otherwise vary. Further information on fee status, fee increases and the fee schedule can be viewed on the UCL Current Students website.

Full details of funding opportunities can be found on the UCL Scholarships website: www.ucl.ac.uk/scholarships

**APPLICATION DEADLINE**

All applicants: 11 August 2017

Details on how to apply are available on the website at: www.ucl.ac.uk/graduate/apply
