BIOLOGICAL SCIENCES BSc  
UCAS CODE: C900  
2018 ENTRY  

www.ucl.ac.uk/prospectus/biolsci
The Biological Sciences BSc offers you an extremely wide choice of optional modules ranging from molecular genetics to behaviour and ecology, and a flexible programme of study. Taught across the Faculty of Life Sciences, we offer a breadth of biological education unmatched in almost any other UK university.

Key information

Programme starts
September 2018

Location
London, Bloomsbury

Degree benefits

- You will have the opportunity to choose a specialist degree pathway: Biodiversity and Conservation, Genetics, Human Genetics, Cell Biology or Zoology.
- Our research-led teaching takes advantage of our links with London-based organisations including the Natural History Museum, ZSL London Zoo, the UCL Institute of Healthy Ageing and the UCL Centre for Biodiversity and Environment Research.
- You will have the benefit of our excellent facilities, including our field station at Blakeney Point in Norfolk, our on-site museum, the Grant Museum of Zoology and the newly refurbished UCL Cruciform Hub.
- Our Summer Studentship scheme allows second-year students to experience original research in the laboratory or the field.

Research Excellence Framework (REF) 2014

The Research Excellence Framework, or REF, is the system for assessing the quality of research in UK higher education institutions. The 2014 REF was carried out by the UK’s higher education funding bodies, and the results used to allocate research funding from 2015/16.

- 82% rated 4* ‘world-leading’ or 3* ‘internationally excellent’

Learn more about the scope of UCL’s research, and browse case studies, on our Research Impact website.

Degree structure

In each year of your degree you will take a number of individual modules, normally valued at 0.5 or 1.0 credits, adding up to a total of 4.0 credits for the year. Modules are assessed in the academic year in which they are taken. The balance of compulsory and optional modules varies from programme to programme and year to year. A 1.0 credit is considered equivalent to 15 credits in the European Credit Transfer System (ECTS).

The first year of this programme covers a core range of subjects from across the spectrum of biological sciences, giving you a firm foundation upon which to base your later choices.

In your second year, you can either continue towards a degree in general biological sciences, or you can choose from five specialised degree pathways.

In your third year you have the choice to take modules from many different subjects across UCL. You can choose a research or a literature project based with one of UCL’s research groups.

Specialist degree programmes

You can transfer to any of the following specialist degree programmes after year one:

- Biodiversity and Conservation focuses on the interactions between organisms and populations with the environments they inhabit;
- Cell Biology focuses on cell function and its role in major human diseases;
- Genetics focuses on evolutionary, genomic and population genetics;
- Human Genetics focuses on gene function in disease; and
- Zoology focuses on the study of animals in all their complexity and diversity.

Further information on these specialist degree programmes can be found on the Biological Sciences departmental webpage.

YEAR ONE

Core or compulsory module(s)

- Biochemistry and Molecular Biology
- Introduction to Genetics
- Introduction to Microbiology
- Cells and Development
- Life on Earth
- Quantitative Biology
- Methods in Ecology and Evolution

Optional modules

- Either Chemistry for Biologists or Fundamentals of Biology

YEAR TWO

Pathway options

- In the second year, you will have the opportunity to either remain on the generalist Biological Sciences programme, or select a specialist pathway in:
  - Biodiversity and Conservation
  - Genetics
  - Human Genetics
  - Cell Biology
  - Zoology

- Further information on these specialist degree programmes can be found on the Biological Sciences departmental webpage.
Your learning

The programme consists of lectures, seminars, tutorials, practicals, e-learning and supported personal study. You will have the opportunity to take part in UCL’s world-leading research from your first year onwards, either in the laboratory or studying animals and plants in their natural habitats.

Fieldwork

You will have the option of taking field courses based at our Blakeney Point field station in year one and in Spain or in Scotland in year two.

Assessment

Initially you will be assessed primarily by end-of-year examinations with a smaller component from practical reports or other coursework such as essays. As your programme progresses research-based coursework exercises will become more important, culminating in a final-year project.

Your career

Biological Sciences opens up a wide range of careers. There is key skills training embedded in our degrees (e.g., in statistics, computing and in giving presentations), which helps make you attractive to employers.

Many of our graduates choose to undertake further studies, aiming for a research career in a university or in industry. As well as careers in scientific fields, such as in the health service, conservation or the pharmaceutical industry, our graduates have also pursued further training or employment in management, teaching, accounting, the civil service and law.

First career destinations of recent graduates (2013-2015) of this programme include:

- Analyst, Goldman Sachs
- MBBS Medicine (Graduate Entry Programme), King’s College London
- PGCE Science, Canterbury Christ Church University
- MRC Centre Neuromuscular Diseases PhD programme, University College London (UCL)
- MSc in Science and Media Study, Imperial College Business School, Imperial College

Your application

Application for admission should be made through UCAS (the Universities and Colleges Admissions Service). Applicants currently at school or college will be provided with advice on the process; however, applicants who have left school or who are based outside the United Kingdom may obtain information directly from UCAS.

When we read your application we will be checking not only that you meet our academic entry requirements but also for evidence of your interest in the subject and your involvement in related activities, for example, through extracurricular science clubs, laboratory visits or participation in summer schools.

If you live in the UK and you receive an offer, you will be invited to attend an open day. This will involve talks from staff about the programme and the department, a tour of UCL and a visit to a research laboratory.
Entry requirements

A LEVELS
Grades
AAA

Subjects
Biology required plus one from Chemistry, Mathematics or Physics.

GCSE
English Language and Mathematics at grade B. For UK-based students, a grade C or equivalent in a foreign language (other than Ancient Greek, Biblical Hebrew or Latin) is required. UCL provides opportunities to meet the foreign language requirement following enrolment, further details at: www.ucl.ac.uk/ug-reqs

IB DIPLOMA
Points
38 overall.

Subjects
A total of 18 points in three higher level subjects including Biology at grade 6 and one from Chemistry, Mathematics or Physics, with no score below 5.

OTHER QUALIFICATIONS
UCL considers a wide range of UK and international qualifications for entry into its undergraduate programmes. Full details are given at: www.ucl.ac.uk/otherquals

UNDERGRADUATE PREPARATORY CERTIFICATES (International foundation courses)
The Undergraduate Preparatory Certificates (UPCs) are intensive one-year foundation courses for international students of high academic potential who are aiming to gain access to undergraduate degree programmes at UCL and other top UK universities.

Typical UPC students will be high achievers in a 12-year school system which does not meet the standard required for direct entry to UCL.

For more information see: www.ucl.ac.uk/upc.

TUITION FEES
The fees indicated are for undergraduate entry in the 2017/18 academic year and are for the first year of the programme at UCL only. Fees for 2018 entry will appear here as soon as they are available.

UK & EU: £9,250 (2017/18 - see below)
Overseas: £21,960 (2017/18)

The UK/EU fee quoted above may be subject to increase for the 2018/19 academic year and for each year of study thereafter and UCL reserves the right to increase its fees in line with UK government policy (including on an annual basis for each year of study during a programme). Fees for overseas students may be subject to an annual increase in subsequent years of study by up to 5%.

Please see the full details of UCL’s fees and possible changes on the UCL Current Students website.

FUNDING
Various funding options are available, including student loans, scholarships and bursaries. UK students whose household income falls below a certain level may also be eligible for a non-repayable bursary or for certain scholarships. Please see the Fees and funding pages for more details.
