This four-year programme offers an additional year on top of the Chemical Physics BSc, providing scope for greater in-depth study in advanced topics such as quantum mechanics and computational chemistry. It is ideal if you intend to pursue a science-based career.

Key information

Programme starts
September 2019

Location
London, Bloomsbury

Degree benefits

// Consistently regarded as one of the best chemistry departments in the UK, we offer you an excellent education with high standards of teaching.

// You will benefit from our outstanding research profile as you are taught by lecturers who are experts in a wide range of chemistry-related fields.

// The department has a rich history at the intersection of chemistry and physics, and is home to UCL's Centre for Computational Chemistry and the Centre for Cosmic Chemistry and Physics.

// We offer access to state-of-the-art facilities, enhanced by our strong affiliation to other centres of excellence such as the London Centre for Nanotechnology.

Degree structure

In each year of your degree you will take a number of individual modules, normally valued at 15 or 30 credits, adding up to a total of 120 credits for the year. Modules are assessed in the academic year in which they are taken. The balance of compulsory and optional modules varies from programme to programme and year to year. A 30-credit module is considered equivalent to 15 credits in the European Credit Transfer System (ECTS).

Chemical Physics is offered either as a three-year BSc programme or as a four-year MSci. Modules are identical for the first two years of study, so you can defer which to opt for until the end of your second year. We advise you, however, to select the four-year MSci programme initially as this gives you the most control over your plans.

Although the Chemical Physics MSci is based on core chemistry modules, there is more scope to develop skills in physics and theoretical aspects of chemistry, and either inorganic chemistry or organic chemistry is omitted after the first year in favour of mathematics, physics and specialist chemical physics modules.

In year one all modules are compulsory, and in year two you will take a combination of compulsory modules together with a number of optional Chemistry modules and further modules from outside the department. In the third year you take further compulsory and optional modules including a core literature project and extended laboratory classes.

In the final year of the MSci, you will undertake a chemical research project and optional modules, allowing you to specialise in the chemistry field of your choice.

**YEAR ONE**

Core or compulsory module(s)

// Basic Inorganic Chemistry
Basic Organic Chemistry
Basic Physical Chemistry
Introduction to Chemical Principles
Mathematics for Science 1
Mathematics for Science 2
Physics of the Universe

Optional modules

// All first year modules are compulsory.

**YEAR TWO**

Core or compulsory module(s)

// Chemical Dynamics
Introductory Classical Mechanics
Mathematical Methods In Chemistry
Principles of Physical Chemistry

Optional modules

// You will select 1.0 credit of either inorganic chemistry or organic chemistry options, plus 0.5 credits from further Physics or Mathematics options.
Your learning

Your learning will combine lectures, practical classes and group workshops. In addition you will attend tutorials in groups of four to six students which provide specialised support for the core modules.

Assessment

Modules usually involve at least two methods of assessment; coursework (problem sheets, essays or poster presentations), an examination, or lab classes. Feedback, such as face-to-face marking in laboratories, is always provided. Your final-year project will be assessed through a written report, a presentation and an oral examination.

Your career

As a UCL Chemistry graduate you will have developed both discipline-based and highly sought after analytical skills, for example in logical thought and numeracy.

On completion of your degree you will have the obvious option of pursuing a career within the chemical industry. This is recognised as one of the most exciting and successful contributors to the UK economy, for example in the pharmaceutical, biotechnology and nanotechnology sectors.

First career destinations of recent graduates (2013-2015) of this programme at UCL include:

- Full-time student, DPhil in Systems Approaches to Biomedical Science at the University of Oxford
- Risk Analyst, Kyte Broker
- Full-time student, PhD in Nanotechnology and Regenerative Medicine at UCL

Your application

Application for admission should be made through UCAS (the Universities and Colleges Admissions Service). Applicants currently at school or college will be provided with advice on the process; however, applicants who have left school or who are based outside the United Kingdom may obtain information directly from UCAS.

Together with essential academic requirements, we are looking for strong evidence in your personal statement of your interest in the subject and your understanding of it. These requirements may be evidenced by examples of project work, relevant work experience or, perhaps, through your knowledge of current events involving chemistry. We also look for your ability to communicate clearly in English.

UK-based applicants who demonstrate their potential to meet our academic requirements will be invited to visit UCL for a day. The day will include talks, the opportunity to meet current students and a tour of the department and UCL. You will also attend a university-level lecture.
Entry requirements

**A LEVELS**
*Standard Offer:* AAA. Chemistry, Mathematics and Physics required.
*Contextual Offer:* Contextual offer not available.

**GCSE**
English Language at grade C or 5, plus Mathematics at grade B or 6. For UK-based students, a grade C or 5 or equivalent in a foreign language (other than Ancient Greek, Biblical Hebrew or Latin) is required. UCL provides opportunities to meet the foreign language requirement following enrolment, further details at: [www.ucl.ac.uk/ug-requirements](http://www.ucl.ac.uk/ug-requirements)

**IB DIPLOMA**
*Standard Offer:* 38. A total of 18 points in three higher level subjects including Chemistry, Mathematics and Physics, with no score below 5.
*Contextual Offer:* Contextual offer not available.

**CONTEXTUAL OFFERS – ACCESS UCL SCHEME**
As part of our commitment to increasing participation from underrepresented groups, students may be eligible for a contextual offer as part of the Access UCL scheme. For more information see [www.ucl.ac.uk/prospectus](http://www.ucl.ac.uk/prospectus)

**OTHER QUALIFICATIONS**
UCL considers a wide range of UK and international qualifications for entry into its undergraduate programmes. Full details are given at: [www.ucl.ac.uk/otherquals](http://www.ucl.ac.uk/otherquals)

**UNDERGRADUATE PREPARATORY CERTIFICATES (International foundation courses)**
UCL Undergraduate Preparatory Certificates (UPCs) are intensive one-year foundation courses for international students of high academic potential who are aiming to gain access to undergraduate degree programmes at UCL and other top UK universities.

Typical UPC students will be high achievers in a 12-year school system which does not meet the standard required for direct entry to UCL.

For more information see: [www.ucl.ac.uk/upc](http://www.ucl.ac.uk/upc).

---

**TUITION FEES**
The fees indicated are for undergraduate entry in the 2019/20 academic year. The UK/EU fees shown are for the first year of the programme at UCL only. Fees for future years may be subject to an inflationary increase. The Overseas fees shown are the fees that will be charged to 2019/20 entrants for each year of study on the programme, unless otherwise indicated below.

- **UK & EU:** £9,250 (2019/20)
- **Overseas:** £26,740 (2019/20)

Full details of UCL’s tuition fees, tuition fee policy and potential increases to fees can be found on the [UCL Students website](http://www.ucl.ac.uk/).

**Additional costs**
If you are concerned by potential additional costs for books, equipment, etc. on this programme, please get in touch with the relevant departmental contact (details given on this page).

**FUNDING**
UCL Chemistry offers a number of scholarships, including the Bader Bursaries, GSK Bursary, UCL Chemistry Entrance Scholarships and the Kathleen Lonsdale Bursary.

Various funding options are available, including student loans, scholarships and bursaries. UK students whose household income falls below a certain level may also be eligible for a non-repayable bursary or for certain scholarships. Please see the [Fees and funding pages](http://www.ucl.ac.uk/) for more details.

**CONTACT**
Dr Dejan-Kresimir Bucar
*Email:* admissions.chem@ucl.ac.uk
*Telephone:* +44 (0)20 7679 4511
*Department:* Chemistry

**EU referendum**
For up-to-date information relating to specific key questions following the UK’s decision to leave the EU, please refer to: [www.ucl.ac.uk/ucl-and-europe](http://www.ucl.ac.uk/ucl-and-europe)

**Disclaimer**
This information is for guidance only. It should not be construed as advice nor relied upon and does not form part of any contract. For more information on UCL’s degree programmes please see the UCL Undergraduate Prospectus at [www.ucl.ac.uk/prospectus](http://www.ucl.ac.uk/prospectus)
