CHEMISTRY WITH MANAGEMENT STUDIES BSc / UCAS CODE: F1N2 2018 ENTRY

www.ucl.ac.uk/prospectus/chemistry
The Chemistry with Management Studies BSc at UCL is ideal if you are considering a career in management and are seeking to develop managerial skills. The core of the programme’s chemistry component is the same as the Chemistry BSc, giving you the same thorough grounding in all major aspects of the subject.

**Key information**

**Programme starts**
September 2018

**Location**
London, Bloomsbury

**Degree benefits**

// Consistently regarded as one of the best chemistry departments in the UK, we offer you an excellent education with high standards of teaching.

// You will benefit from our outstanding research profile as you are taught by lecturers who are experts in a wide range of chemistry-related fields.

// The UCL School of Management contributes to programmes across UCL and you will have the opportunity to work alongside students taking many different degree programmes.

// We offer access to state-of-the-art facilities, enhanced by our strong affiliation with other centres of excellence such as the London Centre for Nanotechnology.

**Research Excellence Framework (REF) 2014**
The Research Excellence Framework, or REF, is the system for assessing the quality of research in UK higher education institutions. The 2014 REF was carried out by the UK’s higher education funding bodies, and the results used to allocate research funding from 2015/16.

// 94% rated 4* (‘world-leading’) or 3* (‘internationally excellent’)

Learn more about the scope of UCL’s research, and browse case studies, on our Research Impact website.

**Degree structure**

In each year of your degree you will take a number of individual modules, normally valued at 0.5 or 1.0 credits, adding up to a total of 4.0 credits for the year. Modules are assessed in the academic year in which they are taken. The balance of compulsory and optional modules varies from programme to programme and year to year. A 1.0 credit is considered equivalent to 15 credits in the European Credit Transfer System (ECTS).

This programme is offered either as a three-year BSc or as a four-year MSci. The first two years of study are identical, so you can defer which to opt for until the end of your second year. We advise you to select the four-year MSci initially as this keeps more options open.

The chemistry content directly follows that of the single-subject Chemistry programme. You will cover the full range of chemistry core components, together with optional modules in chemistry and other options from outside the department.

The management component takes up around 25% of the whole programme. Compulsory half-credit modules include Foundations of Management, and Business in a Competitive Environment and in year three you will choose one optional module such as Mastering Entrepreneurship, Marketing Communication and Law for Managers, amongst others.

Further half-credit modules may be chosen from Statistical Methods and Computing, Communication of Scientific Ideas, Social and Business Psychology, Occupational Psychology, Operational Research, amongst others.

You will also undertake a literature project in the final year.

**YEAR ONE**

<table>
<thead>
<tr>
<th>Core or compulsory module(s)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Basic Inorganic Chemistry</td>
</tr>
<tr>
<td>Basic Organic Chemistry</td>
</tr>
<tr>
<td>Basic Physical Chemistry</td>
</tr>
<tr>
<td>Foundations of Management</td>
</tr>

Data taken from the 'Destinations of Leavers from Higher Education' survey undertaken by HESA looking at the destinations of UK and EU students in the 2013-2015 graduating cohorts six months after graduation.

**FINAL YEAR**

Core or compulsory module(s)

- Advanced Topics in Inorganic Chemistry
- Advanced Topics in Physical Chemistry
- Principles and Methods of Organic Synthesis
- Strategic Project Management
- Synthetic Chemistry and Instrumentation
- Chemical Literature

Optional modules

- You will select 1.0 credit from a wide range of optional modules in management, chemistry and other approved undergraduate options. At least 0.5 credits must be in management and these options may include:
  - Corporate Financial Strategy
  - E-Business Environment and Management
  - Entrepreneurship: Theory and Practice
  - Fraud, Ethics and Forensic Accounting
  - Innovation Management
  - International Business
  - Law for Managers
  - Marketing Communications
  - Mastering Entrepreneurship
  - Operations and Technology Management
  - Organisational Change
  - Strategic Human Resource Management

**Your learning**

Your learning will combine lectures, practical classes and group workshops. In addition you will attend tutorials in groups of four to six students which provide specialised support for the core modules.

**Assessment**

Each module will usually involve at least two methods of assessment. These may include coursework (problem sheets, essays or poster presentations), an examination, or laboratory classes. We believe in providing feedback to students, such as face-to-face marking in laboratories. Your third-year project will be assessed through a written report.

**Your career**

As a UCL Chemistry graduate you will have developed both discipline-based and highly sought after analytical skills, for example in logical thought and numeracy.

On completion of your degree you will have the obvious option of pursuing a career within the chemical industry. This is recognised as one of the most exciting and successful contributors to the UK economy, for example in the pharmaceutical, biotechnology and nanotechnology sectors.

Please see first destinations of recent graduates (2013-2015) from UCL Chemistry programmes for a selection of representative careers.

- SAP Associate Consultant, PCCW
- Technical Consultant, IBM
- Researcher, GlaxoSmithKline
- Investment Banking Analyst, Bank of America Merrill Lynch

**Your application**

Application for admission should be made through UCAS (the Universities and Colleges Admissions Service). Applicants currently at school or college will be provided with advice on the process; however, applicants who have left school or who are based outside the United Kingdom may obtain information directly from UCAS.

Together with essential academic requirements, we are looking for strong evidence in your personal statement of your interest in the subject and your understanding of it. These requirements may be evidenced by examples of project work, relevant work experience or, perhaps, through your knowledge of current events involving chemistry. We also look for your ability to communicate clearly in English.

UK-based applicants who demonstrate their potential to meet our academic requirements will be invited to visit UCL for a day. The day will include talks, the opportunity to meet current students and a tour of the department and UCL. You will also attend a university-level lecture.
**Entry requirements**

**A LEVELS**

**Grades**

AAA-AAB

**Subjects**

Chemistry and either one science subject or Mathematics required.

**GCSE**

English Language at grade C or 5, plus Mathematics at grade B or 6.

For UK-based students, a grade C or 5 or equivalent in a foreign language (other than Ancient Greek, Biblical Hebrew or Latin) is required. UCL provides opportunities to meet the foreign language requirement following enrolment, further details at: www.ucl.ac.uk/ug-reqs

**IB DIPLOMA**

**Points**

36-38 overall.

**Subjects**

A score of 17-18 points in three higher level subjects including Chemistry and either a science subject or Mathematics, with no score lower than 5.

**OTHER QUALIFICATIONS**

UCL considers a wide range of UK and international qualifications for entry into its undergraduate programmes. Full details are given at: www.ucl.ac.uk/otherquals

**UNDERGRADUATE PREPARATORY CERTIFICATES (International foundation courses)**

The Undergraduate Preparatory Certificates (UPCs) are intensive one-year foundation courses for international students of high academic potential who are aiming to gain access to undergraduate degree programmes at UCL and other top UK universities.

Typical UPC students will be high achievers in a 12-year school system which does not meet the standard required for direct entry to UCL.

For more information see: www.ucl.ac.uk/upc.

**TUITION FEES**

The fees indicated are for undergraduate entry in the 2018/19 academic year. The UK/EU fees shown are for the first year of the programme at UCL only. The Overseas fees shown are the fees that will be charged to 2018/19 entrants for each year of study on the programme, unless otherwise indicated below.

// UK & EU: £9,250 (2018/19)

// Overseas: £25,960 (2018/19)

Full details of UCL’s tuition fees, tuition fee policy and potential increases to fees can be found on the UCL Students website.

**FUNDING**

UCL Chemistry offers a number of scholarships, including the Bader Bursaries, GSK Bursary, UCL Chemistry Entrance Scholarships and the Kathleen Lonsdale Bursary.

Various funding options are available, including student loans, scholarships and bursaries. UK students whose household income falls below a certain level may also be eligible for a non-repayable bursary or for certain scholarships. Please see the Fees and funding pages for more details.
