CHEMISTRY WITH MANAGEMENT STUDIES MSci / UCAS CODE: F1NF 2018 ENTRY

www.ucl.ac.uk/prospectus/chemistry
This four-year programme offers an additional year on top of the Chemistry with Management Studies BSc in which to investigate both disciplines in greater depth. The programme offers a thorough grounding in management skills while all major aspects of chemistry are explored and developed.

**Key information**

**Programme starts**
September 2018

**Location**
London, Bloomsbury

**Degree benefits**

- Consistently regarded as one of the best chemistry departments in the UK, we offer you an excellent education with high standards of teaching.
- You will benefit from our outstanding research profile as you are taught by lecturers who are experts in a wide range of chemistry-related fields.
- The MSci allows you to study more advanced topics and to work on an extended research project within one of our internationally renowned research groups.
- We offer access to state-of-the-art facilities, enhanced by our strong affiliation with other centres of excellence such as the London Centre for Nanotechnology.

**Research Excellence Framework (REF) 2014**
The Research Excellence Framework, or REF, is the system for assessing the quality of research in UK higher education institutions. The 2014 REF was carried out by the UK’s higher education funding bodies, and the results used to allocate research funding from 2015/16.

- 94% rated 4* ('world-leading') or 3* ('internationally excellent')

Learn more about the scope of UCL’s research, and browse case studies, on our Research Impact website.

**Degree structure**

In each year of your degree you will take a number of individual modules, normally valued at 0.5 or 1.0 credits, adding up to a total of 4.0 credits for the year. Modules are assessed in the academic year in which they are taken. The balance of compulsory and optional modules varies from programme to programme and year to year. A 1.0 credit is considered equivalent to 15 credits in the European Credit Transfer System (ECTS).

This programme is offered either as a three-year BSc or as a four-year MSci. The first two years of study are identical, so you can defer which to opt for until the end of your second year. We advise you to select the four-year MSci initially as this keeps more options open.

The chemistry content directly follows that of the single-subject Chemistry programme. You will cover the full range of chemistry core components, together with optional modules in chemistry and other options from outside the department.

The management component takes up around 25% of the whole programme. Compulsory half-credit modules include Foundations of Management, and Business in a Competitive Environment and in year three you will choose one optional module from Mastering Entrepreneurship, Marketing Communication and Law for Managers, amongst others.

In the third year you will undertake a literature project and in the final year a chemical research project together with optional modules, allowing you to specialise in the field of chemistry of your choice.

**YEAR ONE**

**Core or compulsory module(s)**

- Basic Inorganic Chemistry
- Basic Organic Chemistry
- Basic Physical Chemistry
- Foundations of Management
- Introduction to Chemical Principles
- Introductory Statistical Methods and Computing

**Optional modules**

- You will select a Mathematics module appropriate to your level of qualification to the value of 0.5 credits.

**YEAR TWO**

**Core or compulsory module(s)**

- Business in a Competitive Environment
- Management Information and Control
- Principles of Inorganic Chemistry
- Principles of Organic Chemistry
- Principles of Physical Chemistry

**Optional modules**

- All second year modules are compulsory.
Your learning

Your learning will combine lectures, practical classes and group workshops. In addition you will attend tutorials in groups of four to six students which provide specialised support for the core modules.

Assessment

Modules usually involve at least two methods of assessment; coursework (problem sheets, essays or poster presentations), an examination, or lab classes. Feedback, such as face-to-face marking in laboratories, is always provided. Your final year project will be assessed through a written report, a presentation and an oral examination.

Your career

As a UCL Chemistry graduate you will have developed both discipline-based and highly sought after analytical skills, for example in logical thought and numeracy.

On completion of your degree you will have the obvious option of pursuing a career within the chemical industry. This is recognised as one of the most exciting and successful contributors to the UK economy, for example in the pharmaceutical, biotechnology and nanotechnology sectors.

First career destinations of recent graduates (2013-2015) of this programme at UCL include:

- Research Degree: Chemistry, UCL
- Project Manager, Melec Powergen Inc
- Analyst / Implementation Lead, Enterprise AMS Group
- DPhil in Organic Chemistry, University of Oxford

Your application

Application for admission should be made through UCAS (the Universities and Colleges Admissions Service). Applicants currently at school or college will be provided with advice on the process; however, applicants who have left school or who are based outside the United Kingdom may obtain information directly from UCAS.

Together with essential academic requirements, we are looking for strong evidence in your personal statement of your interest in the subject and your understanding of it. These requirements may be evidenced by examples of project work, relevant work experience or, perhaps, through your knowledge of current events involving chemistry. We also look for your ability to communicate clearly in English.

UK-based applicants who demonstrate their potential to meet our academic requirements will be invited to visit UCL for a day. The day will include talks, the opportunity to meet current students and a tour of the department and UCL. You will also attend a university-level lecture.
Entry requirements

A LEVELS
Grades
AAA-AAB
Subjects
Chemistry and either one science subject or Mathematics required.

GCSE
English Language at grade C plus Mathematics at grade B. For
UK-based students, a grade C or equivalent in a foreign language (other
than Ancient Greek, Biblical Hebrew or Latin) is required. UCL provides
opportunities to meet the foreign language requirement following
enrolment, further details at: www.ucl.ac.uk/ug-reqs

IB DIPLOMA
Points
36-38 overall.
Subjects
A score of 17-18 points in three higher level subjects including
Chemistry and either a science subject or Mathematics, with no score
lower than 5.

OTHER QUALIFICATIONS
UCL considers a wide range of UK and international qualifications for
entry into its undergraduate programmes. Full details are given at:
www.ucl.ac.uk/otherquals

UNDERGRADUATE PREPARATORY CERTIFICATES
(International foundation courses)
The Undergraduate Preparatory Certificates (UPCs) are intensive
one-year foundation courses for international students of high academic
potential who are aiming to gain access to undergraduate degree
programmes at UCL and other top UK universities.
Typical UPC students will be high achievers in a 12-year school system
which does not meet the standard required for direct entry to UCL.
For more information see: www.ucl.ac.uk/upc.

TUITION FEES
The fees indicated are for undergraduate entry in the 2017/18
academic year and are for the first year of the programme at UCL
only. Fees for 2018 entry will appear here as soon as they are
available.
// UK & EU: £9,250 (2017/18 - see below)
// Overseas: £23,710 (2017/18)
The UK/EU fee quoted above may be subject to increase for the
2018/19 academic year and for each year of study thereafter and
UCL reserves the right to increase its fees in line with UK government
policy (including on an annual basis for each year of study during a
programme). Fees for overseas students may be subject to an
annual increase in subsequent years of study by up to 5%.

Please see the full details of UCL’s fees and possible changes on the
UCL Current Students website.

FUNDING
UCL Chemistry offers a number of scholarships, including the Bader
Bursaries, GSK Bursary, UCL Chemistry Entrance Scholarships and
the Kathleen Lonsdale Bursary.
Various funding options are available, including student loans,
scholarships and bursaries. UK students whose household income
falls below a certain level may also be eligible for a non-repayable
bursary or for certain scholarships. Please see the Fees and funding
pages for more details.
