GEOGRAPHY BSc / UCAS CODE: F800
2019 ENTRY

www.ucl.ac.uk/prospectus
This is an integrated geography programme which combines physical and human geography as well as offering opportunities for specialisation. Those choosing the BSc will usually have studied some science at A level or equivalent, but it is possible to transfer to the BA if your interests develop differently.

**Key information**

**Programme starts**
September 2019

**Location**
London, Bloomsbury

**Degree benefits**

- You will gain a broad range of practical and project management skills, making you attractive to both the public and private sectors in the UK and around the world.
- We offer an exceptionally wide range of optional modules and have a particularly low staff-student ratio (Guardian University Guide 2018), encouraging individual choice and personal supervision.
- We are proud of our research record which has been consistently high. You will therefore be working with thinkers at the cutting edge of developments in their fields.
- Our physical geography resources include specialist computing facilities for geographical information and satellite image analysis and world-class science laboratories enabling soil, water and microscopic analysis.

**Degree structure**

In each year of your degree you will take a number of individual modules, normally valued at 15 or 30 credits, adding up to a total of 120 credits for the year. Modules are assessed in the academic year in which they are taken. The balance of compulsory and optional modules varies from programme to programme and year to year. A 30-credit module is considered equivalent to 15 credits in the European Credit Transfer System (ECTS).

The Geography BA and BSc share core elements and it is your personal interests, and the options you wish to pursue, that should shape your choice. In your first year you take two core modules and four optional modules, one of which can be outside the department.

In year two, one compulsory module is supplemented by 3.5 credits of optional modules, including field research-based courses, chosen from a substantial pool. At this point it is possible to begin focusing on topics such as environmental and conservation management, remote sensing, geomorphology and climate change.

Your dissertation is the main focus of year three. In this, you'll work with a relevant academic to develop an original piece of research on a topic of your choice. In addition you take further optional modules, which may include participation in exchange programmes with universities in Australia, Canada, Europe or Singapore.

Fieldwork throughout the programme can take place both in the UK and abroad, and it is possible to base your dissertation on an overseas project. Recent destinations include Australia, Belize, India, Montserrat and Papua New Guinea. Financial support for overseas fieldwork expeditions may be available through expedition funds.

**YEAR ONE**

**Core or compulsory module(s)**
- Thinking Geographically
- Geography in the Field

**Core foundational modules**
- You will select modules equivalent to 2.0 credits from a range including:
  - Global Events
  - Space and Society
  - The Earth
  - Environmental Change
  - Human Ecology
- You may take one 0.5 credit module taught outside of Geography if you wish.

**YEAR TWO**

**Core or compulsory module(s)**
- The Practice of Geography

**Core intermediary modules**
- You then select 3.5 credits of intermediary modules from the specialised areas below.
  - To qualify for the BSc, 2.5 of these credits must be in Physical Geography.
  - Human Geography: Cultural and Historical Geography; Development Geography; Environment and Society; Economic Geography; GIS and Geodemographics; Political Geography and Geopolitics; Urban Geography; Human Geography Fieldclass
  - Physical Geography: Ecological Patterns and Processes; Environmental Remote Sensing; Geomorphology; Hydroclimatology; Reconstructing Past Environments; Statistics for Environmental Geographers; Physical Geography Fieldclass
- You may also substitute an ancillary module from outside the department, allowing you (as in your first year) to continue developing particular language skills or start to become more specialised.
Your learning

Your timetable will include lectures, seminars, tutorials, practical classes and fieldwork. As you progress, the focus shifts to independent and critical learning, with student-led discussions and presentations becoming more important.

Assessment

First-year assessment combines independent coursework completed throughout the year, with end-of-year written examinations. In years two and three, assessment may vary - some modules combine written examinations with independent projects, some assessed solely by written examination. Your dissertation carries significant weight in your final year.

Your career

Having developed skills associated with both the sciences and the humanities, UCL geographers are particularly adept at taking different perspectives on an issue or problem. These skills make our graduates attractive to employers.

UCL geographers have a particularly good track record of securing employment after graduation (Guardian University Guide 2018). This may be partly because of the significant project management skills they develop by undertaking their supported dissertation research.

First career destinations of recent graduates (2013-2015) of this programme include:

  // Analyst, Ministry of Defence
  // Ecologist, Royal Society for the Protection of Birds (RSPB)
  // Research Engineer in Applied Intelligence, British Aerospace Engineering
  // Sustainability Adviser, Laing O'Rourke
  // Analyst, Lloyds Banking Group

Your application

Application for admission should be made through UCAS (the Universities and Colleges Admissions Service). Applicants currently at school or college will be provided with advice on the process; however, applicants who have left school or who are based outside the United Kingdom may obtain information directly from UCAS.

In the selection process we aim for there to be two-way communication so both you and the department can make the right choices. In addition to looking at your qualifications we will also be examining your personal statement for evidence of your interest in and enthusiasm for geography and for proficiency in key skills.
Entry requirements

**A LEVELS**

**Standard Offer:** AAA. Geography grade A required.

**Contextual Offer:** ABB. Geography grade A required.

**GCSE**

English Language and Mathematics at grade C or 5. For UK-based students, a grade C or 5 or equivalent in a foreign language (other than Ancient Greek, Biblical Hebrew or Latin) is required. UCL provides opportunities to meet the foreign language requirement following enrolment, further details at: www.ucl.ac.uk/ug-requirements

**IB DIPLOMA**

**Standard Offer:** 38. A total of 18 points in three higher level subjects including grade 6 in Geography, with no score below 5.

**Contextual Offer:** 34. A total of 16 points in three higher level subjects including grade 6 in Geography, with no score below 5.

**CONCEPTUAL OFFERS – ACCESS UCL SCHEME**

As part of our commitment to increasing participation from underrepresented groups, students may be eligible for a contextual offer as part of the Access UCL scheme. For more information see www.ucl.ac.uk/prospectus

**OTHER QUALIFICATIONS**

UCL considers a wide range of UK and international qualifications for entry into its undergraduate programmes. Full details are given at: www.ucl.ac.uk/otherquals

**UNDERGRADUATE PREPARATORY CERTIFICATES (International foundation courses)**

UCL Undergraduate Preparatory Certificates (UPCs) are intensive one-year foundation courses for international students of high academic potential who are aiming to gain access to undergraduate degree programmes at UCL and other top UK universities.

Typical UPC students will be high achievers in a 12-year school system which does not meet the standard required for direct entry to UCL.

For more information see: www.ucl.ac.uk/upc.

---

**TUITION FEES**

The fees indicated are for undergraduate entry in the 2019/20 academic year. The UK/EU fees shown are for the first year of the programme at UCL only. Fees for future years may be subject to an inflationary increase. The Overseas fees shown are the fees that will be charged to 2019/20 entrants for each year of study on the programme, unless otherwise indicated below.

// UK & EU: £9,250 (2019/20)
// Overseas: £24,090 (2019/20)

Full details of UCL’s tuition fees, tuition fee policy and potential increases to fees can be found on the UCL Students website.

**Additional costs**

Field courses in the second and third years are partly funded by the department, and partly self-funded by those students who choose to take them. The department does, however, provide bursaries for those students who are in receipt of a UCL bursary and who wish to undertake these courses. Further details are available on our website.

**FUNDING**

Various funding options are available, including student loans, scholarships and bursaries. UK students whose household income falls below a certain level may also be eligible for a non-repayable bursary or for certain scholarships. Please see the Fees and funding pages for more details.
