MANAGEMENT SCIENCE BSc / UCAS CODE: N991
2018 ENTRY

www.ucl.ac.uk/prospectus/mgmt
Management Science BSc / UCL's Management Science BSc programme is unlike any other degree in the UK. It provides you with an opportunity to develop strong quantitative and analytical skills, an in-depth understanding of how companies work, and a rigorous foundation in the key skills needed to build a successful career with global companies and high-growth businesses tackling world-scale problems.

**Key information**

Programme starts
September 2018

Location
London, Bloomsbury

**Degree benefits**

// This new degree programme provides a rigorous training in management science, with a strong focus on the quantitative skills and mathematics underpinning the practice of management.

// Students will benefit from the world-class facilities and expertise across UCL Engineering.

// The programme places an emphasis on the solving of cross-functional problems. It will train students to understand the challenges – risk, uncertainty, and growth – of complex business.

// Graduates are expected to find positions in high-growth, technology-driven and innovation-intensive organisations such as technology firms, consulting firms and in the banking and finance sector.

**Research Excellence Framework (REF) 2014**
The Research Excellence Framework, or REF, is the system for assessing the quality of research in UK higher education institutions. The 2014 REF was carried out by the UK’s higher education funding bodies, and the results used to allocate research funding from 2015/16.

// 70% rated 4* (‘world-leading’) or 3* (‘internationally excellent’)

Learn more about the scope of UCL’s research, and browse case studies, on our Research Impact website.

**Degree structure**

In each year of your degree you will take a number of individual modules, normally valued at 0.5 or 1.0 credits, adding up to a total of 4.0 credits for the year. Modules are assessed in the academic year in which they are taken. The balance of compulsory and optional modules varies from programme to programme and year to year. A 1.0 credit is considered equivalent to 15 credits in the European Credit Transfer System (ECTS).

Years one and two will consist of core modules relating to the day-to-day operation of business – strategy, marketing, accounting and finance. This will be underpinned by fundamental modules in foundational mathematics, quantitative methods, systems design and analysis, and behavioural science. These modules will be taken alongside students from across UCL Engineering and will bring an interdisciplinary edge to your studies, helping you to look at problems from multiple viewpoints and to tackle challenges from a wider engineering perspective.

In your third year you will continue with advanced modules and may also choose a particular area (for example business analysis, entrepreneurship, financial engineering) in which to specialise according to your interests and the potential career direction you wish to take. You will also undertake a dissertation.

**YEAR ONE**

Core or compulsory module(s)

- Students will take modules covering the following topics:
  - The Art of Science and Management
  - Critical Analytical Thinking
  - Mathematical Foundations of Management I
  - Mathematical Foundations of Management II
  - Business Economics I
  - Business Economics II
  - Data Analytics I
  - Behavioural Science

Optional modules

- All first year modules are compulsory.

**YEAR TWO**

Core or compulsory module(s)

- Students will take modules covering the following topics:
  - Strategy by Design
  - Product, Technology and Operations Management
  - Finance I
  - Mathematical Foundations of Management III
  - Data Analytics II
  - Computational Thinking
  - Design

Optional modules

- Engineering Sciences Minor I

**FINAL YEAR**

Core or compulsory module(s)

- Students will take modules covering the following topics:
  - Marketing Science
  - Decision Science
  - Delivering Results Through People
  - Finance II
  - Management Science Dissertation I
  - Management Science Dissertation II

Optional modules

- Engineering Sciences Minor II
  - Engineering Sciences Minor III
Your learning

Teaching and learning is conducted through lectures, seminars, case studies and practicals. There is a substantial and ever-developing virtual learning environment in which you will be expected to participate fully. Extensive background reading and literature research are required throughout the programme. You will attend special sessions, guest lectures, and regular tutorials.

Assessment

Modules are examined through assessed coursework and written examinations. Examinations take place at the end of each academic year.

Your career

The Management Science degree programmes aim to provide students with a robust set of quantitative and problem-solving skills applicable throughout their life and careers.

Graduates are expected to find positions in high-growth, technology-driven and innovation-intensive organisations such as technology firms, consulting firms and in the banking and finance sector.

As the first cohort of students on the Management Science programmes are not due to graduate until 2017, no information is currently available about their career destinations.

Your application

Application for admission should be made through UCAS (the Universities and Colleges Admissions Service). Applicants currently at school or college will be provided with advice on the process; however, applicants who have left school or who are based outside the United Kingdom may obtain information directly from UCAS.

Your application will be interesting to us if you can demonstrate critical thinking skills and an ability to reason and argue, as well as the strong quantitative skills that are required for this programme. We will be looking for a genuine interest in and motivation for studying topics such as business, innovation, entrepreneurship and technology.

Selection is made based on the information provided in your UCAS application and personal statement.
Entry requirements

A LEVELS
Grades
AAA

Subjects
Mathematics required.

GCSE
English Language and Mathematics at grade C or 5. For UK-based students, a grade C or 5 or equivalent in a foreign language (other than Ancient Greek, Biblical Hebrew or Latin) is required. UCL provides opportunities to meet the foreign language requirement following enrolment, further details at: www.ucl.ac.uk/ug-reqs

IB DIPLOMA
Points
38 overall.

Subjects
A score of 18 points in three higher level subjects, including grade 6 in Mathematics, with no score lower than 5.

OTHER QUALIFICATIONS
UCL considers a wide range of UK and international qualifications for entry into its undergraduate programmes. Full details are given at: www.ucl.ac.uk/otherquals

UNDERGRADUATE PREPARATORY CERTIFICATES (International foundation courses)
The Undergraduate Preparatory Certificates (UPCs) are intensive one-year foundation courses for international students of high academic potential who are aiming to gain access to undergraduate degree programmes at UCL and other top UK universities.

Typical UPC students will be high achievers in a 12-year school system which does not meet the standard required for direct entry to UCL.

For more information see: www.ucl.ac.uk/upc.

TUITION FEES
The fees indicated are for undergraduate entry in the 2018/19 academic year. The UK/EU fees shown are for the first year of the programme at UCL only. The Overseas fees shown are the fees that will be charged to 2018/19 entrants for each year of study on the programme, unless otherwise indicated below.

// UK & EU: £9,250 (2018/19)
// Overseas: £25,960 (2018/19)

Full details of UCL’s tuition fees, tuition fee policy and potential increases to fees can be found on the UCL Students website.

FUNDING
Various funding options are available, including student loans, scholarships and bursaries. UK students whose household income falls below a certain level may also be eligible for a non-repayable bursary or for certain scholarships. Please see the Fees and funding pages for more details.
