MATHEMATICS WITH MODERN LANGUAGES BSc / UCAS CODE: G1T9 2019 ENTRY

www.ucl.ac.uk/prospectus
Mathematics with Modern Languages BSc

This three-year programme offers a comprehensive education in mathematics along with the opportunity to achieve proficiency in two or more modern languages from a choice of Arabic, French, German, Italian, Japanese, Mandarin, Spanish and possibly others. Graduates are equipped for careers that may take them to Europe or further afield.

Key information

Programme starts
September 2019

Location
London, Bloomsbury

Degree benefits

- Gain transferable skills such as numeracy, problem-solving and logical thinking, which can lead to a large variety of interesting, diverse and well-paid careers.
- UCL's Centre for Languages & International Education (CLIE) offers the latest language-learning technology, including a CD-Rom interactive video facility, an audio laboratory, Computer Assisted Language Learning (CALL), satellite television and a wide range of audio-visual material.
- Seven main languages - Arabic, French, German, Italian, Japanese, Mandarin and Spanish - are available for study and all levels of competence can be catered for.
- It is possible to study a programme leading to a qualification in TEFL (Teaching English as a Foreign Language. General modules in European Studies may also be available.

Degree structure

In each year of your degree you will take a number of individual modules, normally valued at 15 or 30 credits, adding up to a total of 120 credits for the year. Modules are assessed in the academic year in which they are taken. The balance of compulsory and optional modules varies from programme to programme and year to year. A 30-credit module is considered equivalent to 15 credits in the European Credit Transfer System (ECTS).

In the first two years of the programme, you will receive a thorough grounding in pure mathematics and mathematical methods, following the same modules as the single-subject Mathematics students, taking 3.0 credits a year. In place of the applied mathematics modules you will take 1.0 credit in modern languages each year. Having laid the basic foundations there is a wide range of options in both mathematics and languages in the third year.

Alongside the seven main languages, it is sometimes possible to provide study in other languages such as Dutch, Hebrew, Portuguese, Scandinavian and Slavonic languages.

Language modules are offered at seven levels from complete beginner’s (level 1) to advanced (level 4) and post A level (levels 5-7). Each student is expected to study at least one language to level 4, and you are encouraged to study other languages in addition.

This programme is offered as a three-year BSc or a four-year MSci degree. The first two years of the programme are identical, and students are advised to apply for the MSci degree in the first instance, as it is possible to transfer to the BSc during the first three years.

<td>Mathematical Methods 3</td>
</tr>
</tbody>
</table>

Optional modules

- You will select three of the following modules, to the value of 1.5 credits:
  - Algebra 4: Groups and Rings
  - Analysis 4: Real Analysis
  - Computational Methods
  - Geometry and Groups
  - Mathematical Methods 4
  - Number Theory
  - Probability and Statistics
- One of the modules may be replaced by a half-credit outside option, subject to departmental approval.
- You will also select 1.0 credit of modules in your chosen language(s).
Data taken from the 'Destinations of Leavers from Higher Education' survey undertaken by HESA looking at the destinations of UK and EU students in the 2013-2015 graduating cohorts six months after graduation.

### FINAL YEAR

#### Core or compulsory module(s)
- All final-year modules are optional.
- Currently available mathematics options are described on the UCL Mathematics website.

#### Optional modules
- You will select:
  - 2.0 credits of third-year mathematics options
  - 1.0 credit of language options
  - 1.0 credit of third-year mathematics options, language options or approved outside options.

### Your learning

Teaching is mainly carried out through lectures and small-group tutorials. Problem classes allow you to exercise the skills you have learned. In addition, an 'office hours' system for each programme allows you to meet with tutors on a one-to-one basis to review parts of the degree that you find interesting or need clarifying. A Student Mentor scheme runs in the department offering support and advice to first-years.

### Assessment

Most modules are assessed by two-hour written examinations in the third term, with a small element (10%) of coursework assessment.

### Your career

We aim to develop your skills in mathematical reasoning, problem-solving and accurate mathematical manipulation. You will also learn to handle abstract concepts and to think critically, argue logically and express yourself clearly.

A mathematics degree is highly valued by employers due to the skills in logical thinking, analysis, problem-solving and, of course, numeracy, that it develops.

First career destinations of recent graduates (2013-2015) of Mathematics with Modern Languages programmes at UCL include:

- Research Finance Analyst, Cancer Research UK

### Your application

Application for admission should be made through UCAS (the Universities and Colleges Admissions Service). Applicants currently at school or college will be provided with advice on the process; however, applicants who have left school or who are based outside the United Kingdom may obtain information directly from UCAS.

In addition to academic requirements, we expect you to demonstrate an understanding and enjoyment of the subject beyond the examined syllabus, through your reading and involvement in problem-solving activities. Evidence of your curiosity and perseverance in tackling puzzles, and your enjoyment of logical and abstract thinking, should be shown in your application.
Entry requirements

**A LEVELS**

**GCSE**

English Language and Mathematics at grade C or 5. For UK-based students, a grade C or 5 or equivalent in a foreign language (other than Ancient Greek, Biblical Hebrew or Latin) is required. UCL provides opportunities to meet the foreign language requirement following enrolment, further details at: [www.ucl.ac.uk/ug-reqs](http://www.ucl.ac.uk/ug-reqs)

**IB DIPLOMA**

**Standard Offer:** 39-40. A score of 20 points in three higher level subjects including 7 in Mathematics, or 19 points in three higher level subjects including 7 in Mathematics and a 2 in any STEP paper or a distinction in Mathematics AEA, with no score below 5.

**Contextual Offer:** 39. A score of 19 points in three higher level subjects including 7 in Mathematics, with no score below 5.

**CONTEXTUAL OFFERS – ACCESS UCL SCHEME**

As part of our commitment to increasing participation from underrepresented groups, students may be eligible for a contextual offer as part of the Access UCL scheme. For more information see: [www.ucl.ac.uk/prospectus](http://www.ucl.ac.uk/prospectus)

**OTHER QUALIFICATIONS**

UCL considers a wide range of UK and international qualifications for entry into its undergraduate programmes. Full details are given at: [www.ucl.ac.uk/otherquals](http://www.ucl.ac.uk/otherquals)

**UNDERGRADUATE PREPARATORY CERTIFICATES (International foundation courses)**

UCL Undergraduate Preparatory Certificates (UPCs) are intensive one-year foundation courses for international students of high academic potential who are aiming to gain access to undergraduate degree programmes at UCL and other top UK universities.

Typical UPC students will be high achievers in a 12-year school system which does not meet the standard required for direct entry to UCL.

For more information see: [www.ucl.ac.uk/upc](http://www.ucl.ac.uk/upc).

**TUITION FEES**

The fees indicated are for undergraduate entry in the 2019/20 academic year. The UK/EU fees shown are for the first year of the programme at UCL only. Fees for future years may be subject to an inflationary increase. The Overseas fees shown are the fees that will be charged to 2019/20 entrants for each year of study on the programme, unless otherwise indicated below.

- UK & EU: £9,250 (2019/20)
- Overseas: £23,470 (2019/20)

Full details of UCL’s tuition fees, tuition fee policy and potential increases to fees can be found on the [UCL Students website](http://www.ucl.ac.uk/students).

**FUNDING**

Various funding options are available, including student loans, scholarships and bursaries. UK students whose household income falls below a certain level may also be eligible for a non-repayable bursary or for certain scholarships. Please see the [Fees and funding pages](http://www.ucl.ac.uk/students/fees) for more details.
