Advanced Seismic Design of Structures (CEGE0061)

Description
The course provides an insight to the latest methods, technologies and practical approaches implemented in Earthquake Engineering for designing and assessing the built environment.

This course is intended to cover the following topics:

- Overview of Seismic Design of Structures to EuroCode 8
- Seismic Design of Steel Structures (e.g. Moment Resisting & Braced Frames)
- Elastic and Inelastic Response Spectra
- Modal and Response Spectrum Analysis
- Performance Based Earthquake Engineering (PBEE)
- Performance Based Seismic Design (PBSD) & Assessment (PBSA) of Structures:
  - Probabilistic Seismic Hazard Assessment (PSHA)
  - Nonlinear Structural Analysis Modelling
  - Fragility & Vulnerability Function Derivation
  - Damage Assessment
  - Loss Assessment
