Chemical Engineering

Research Methods - Qualitative (CENG0044)

Description

Aims:
To provide students with the skills necessary to carry out the research component of MSc programmes effectively and successfully.

Learning outcomes:
Upon completion, the students will be expected to have gained:

- understanding of the necessity and principle of research and the scientific method;
- understanding of research methods available and in which domain they are most appropriate;
- understanding of the advantages and disadvantages of these methods;
- understanding of how to manage a research project;
- knowledge on how to carry out an effective literature review.

Synopsis:
This module will provide students with an introduction to research, giving an insight into the underlying principles upon which research is based. It will then go on to describe the tools and methods used to carry out and disseminate qualitative research. It will include 8 major themes:

- Research Ethics
- What Is Research and How Can We Undertake It?
- Project Management
- Interacting With ‘the Literature’
- Collecting and Recording Data
- Analysis of Qualitative Data
- Written Presentation Skill
- Oral and Visual Presentation Skill

Key information

Year: 2019/20
Credit value: 15 (150 study hours)
Delivery: PGT L7, Campus-based
Reading List: View on UCL website
Tutor: Dr Thomas Miller
Term: Term 1
Timetable: View on UCL website

Assessment

- Written examination (departmentally managed): 20%
- Coursework: 60%
- Oral Presentation: 20%
