Computer Graphics (COMP0027)

Description

Aims:
To introduce the fundamental concepts of 3D computer graphics and give the students all the knowledge needed for creating an image of a virtual world from first principles.

Learning outcomes:
On successful completion of the module, a student will be able to:
1. define a virtual world and create images of it;
2. write a basic ray tracer, and use a graphics library such as OpenGL (or equivalent);

Content:
Introduction:
- The painter’s method;

Creating an image using ray tracing:
- Ray casting using a simple camera;
- Local illumination;
- Global illumination with recursive ray tracing;

Specifying a general camera:
- World / image coordinates;
- Creation of an arbitrary camera;
- Ray tracing with an arbitrary camera;

Constructing a scene:
- Scene hierarchy;
- Transformations of objects / rays;
- Other modelling techniques;

Acceleration Techniques:
- Bounding volumes;
- Space subdivision;

From ray tracing to projecting polygons:
- Graphics pipeline;
- Transforming the polygons to image space;
- Sutherland-Hodgman clipping;

Key information

Year 2019/20
Credit value 15 (150 study hours)
Delivery UG L6, Campus-based
Reading List View on UCL website
Tutor Dr Tobias Ritschel
Term Term 1
Timetable View on UCL website

Assessment

For more information about the department, programmes, relevant open days and to browse other modules, visit ucl.ac.uk

Disclaimer: All information correct as of June 2019. Please note that aspects of the module may be subject to change. UCL will make best efforts to inform applicants of major changes.
- Scan conversion;
- Z-buffer;
- Interpolated shading;
- Texture mapping;
- Back face culling;

Shadows:
- Shadow volumes;
- Shadow buffer;
- Shadow mapping;
- Soft shadows;

The nature of light:
- Transport theory, Radiance, luminance, radiosity;
- The radiance equation;
- Photon mapping;
- Monte Carlo integration;

Parametric surfaces:
- Bezier Curves;
- B-Splines Curves;

Requisites:
In order to be eligible to select this module, a student must be registered on a programme for which it is a formally-approved option or elective choice AND must have EITHER (i) passed BSc/ MEng Computer Science (Years 1 and 2) at UCL; OR (ii) passed MEng Mathematical Computation (Years 1 and 2) at UCL.
