

Electronic and Electrical Engineering

Internet Multimedia Systems (ELEC0098)**Description**

This module covers technological and application issues when developing Internet multimedia systems in an all-IP environment.

This concerns usage of IP-based networking infrastructure for real-time, reliable, multimedia delivery within a multitude of client-server architectures encountered today.

The module is assessed through an assignment involving the design, development and testing of a novel technical feature (each student develops their own idea) on a real-world multimedia streaming test-bed, along with a short presentation and a report formed as an IEEE-style paper.

Key information

Year	2018/19
Credit value	15 (150 study hours)
Delivery	PGT L7, Campus-based
Reading List	View on UCL website
Tutor	Dr Laura Toni
Term	Term 2
Timetable	View on UCL website

Assessment

■ Report: 100%
