Medical Physics and Biomedical Engineering

Research Project in Medical Physics and Biomedical Engineering (MPHY0012)

Description
During the first term, intercalated students and third-year BSc and BEng students are required to attend a series of lectures covering important aspects of conducting a research project, including guidance on how to perform a literature search, how to write a research report or scientific paper, and how to give an effective oral presentation. This component of the project will include a coursework assignment worth 10% of the overall project mark. The research skills lectures are optional for fourth-year MSci and MEng students, and these students are not required to complete the coursework (i.e. it is not part of the assessment of this module). The lectures will be recorded and made available on the moodle page.

Key information
- Year: 2019/20
- Credit value: 30 (300 study hours)
- Delivery: PGT L6, Campus-based
- Reading List: View on UCL website
- Tutor: Dr Sergio Bertazzo
- Term: Terms 1 and 2
- Timetable: View on UCL website

Assessment
- Report: 75%
- Oral Presentation: 15%
- Coursework: 10%
