Medical Physics and Biomedical Engineering

Research Software Engineering with Python (MPHY0021)

Description
In this course, you will move beyond programming, to learn how to construct reliable, readable, efficient research software in a collaborative environment. The emphasis is on practical techniques, tips, and technologies to effectively build and maintain complex code. We will use the Python programming language to deliver this content, and you will learn Python programming in this course, developing from simple scripts for analysing research data to efficient numerical computation.

A video description can be found at the UCL Media Central.
