Information Processing in Medical Imaging (MPHY0025)

**Description**
This module provides an essential introduction to theory and practice for information processing methods in medical imaging and computing.

For students who have basic prior mathematics knowledge and programming experience, detailed concepts and examples of these “building block” topics are introduced.

These, including medical image registration, segmentation and modern machine learning, are important computational components for understanding, developing and applying more advanced, applications-specific approaches in real-world medical imaging applications.

**Key information**
- **Year**: 2018/19
- **Credit value**: 15 (150 study hours)
- **Delivery**: PGT L7, Campus-based
- **Reading List**: View on UCL website
- **Tutor**: Dr Marc Modat
- **Term**: Term 2
- **Timetable**: View on UCL website

**Assessment**
- Coursework: 50%
- Written examination (main exam period): 50%
