Programming Foundations for Medical Image Analysis (MPHY0030)

**Description**

The aims of this module are to equip students with the confidence and basic skills to tackle practical medical image analysis problems using MATLAB and the C++ programming language. The module has a practical rather than theoretical bias, and draws on fundamental concepts in scientific computing and software development. The course is primarily aimed at those engaged in medical image analysis and medical image computing, drawing on example problems in this field, but most of the material is also applicable to programming for a wider range of problems in science and engineering.

**Key information**

- **Year**: 2019/20
- **Credit value**: 15 (150 study hours)
- **Delivery**: PGT L7, Campus-based
- **Reading List**: View on UCL website
- **Tutor**: Dr Dean Barratt
- **Term**: Term 1
- **Timetable**: View on UCL website

**Assessment**

- Coursework: 100%
