Description
This module counts for 15 points of academic credit and is taken in the last year of studies for those students completing their degree on a multi-year time-frame. Known as a "Comprehensive" module, it requires students to use knowledge and skills developed across the entire MSc. It will assess your ability to communicate concepts clearly and develop ideas in a team to achieve a satisfying final goal - inventing a brand new medical device. Such skills will be essential to your career development as a scientist or engineer in healthcare.
