Medical Physics and Biomedical Engineering

MRes Dissertation (MPHY0034)

Description
Students should undertake a project which is appropriate to their particular “stream”:
Radiation Physics (RP), Biomedical Engineering and Medical Imaging (BEMI) or Medical Image Computing (MIC).

Inevitably, most projects will have elements of physics, engineering and computing, so students should consider projects which have the greatest emphasis on their particular stream specialism.

Students that will be following the Medical Image Computing stream must select a computing research project.

For additional advice, these students should contact the MIC coordinator Dr Dean Barratt.

Key information
- **Year**: 2018/19
- **Credit value**: 120 (1200 study hours)
- **Delivery**: PGT L7, Campus-based
- **Reading List**: View on UCL website
- **Tutor**: Dr Ilias Tachtsidis
- **Term**: Calendar Year
- **Timetable**: View on UCL website

Assessment
- Report: 100%
