Systems and Problem Solving (SECU0008)

Description
The aim of the module is to help students understand how they can apply their skills to influence the work of architects, product designers, engineers, computer scientists and managers to reduce criminal risks.

For this, the module will teach students about the system-thinking approach, and how it can be applied to crime.

The module also seeks to make students more employable by presenting a number of risk management process models and systems engineering frameworks widely used in industry.

Key information

Year: 2018/19
Credit value: 15 (150 study hours)
Delivery: UG L4, Campus-based
Reading List: View on UCL website
Tutor: Dr Herve Borrion
Term: Term 1
Timetable: View on UCL website

Assessment

- Coursework: 100%
