Cybercrime (SECU0043)

**Description**

The lectures will cover the different types of cybercriminal operations, the techniques used by miscreants to exploit and take advantage of Internet users, the different actors that are active in the online underground economy, and the technical and legal issues faced by law enforcement to take down cybercriminal operations. At the end of the course, students will have gained an all-round view of cybercriminal operations and how to mitigate them, including engineering, legal, and economic aspects.
