Evaluation of Crime Prevention Measures (SECU0052)

**Description**
This module equips students with the knowledge and skills needed effectively to evaluate crime reduction measures. Students will be introduced to evaluation theory, learn how theories can be applied in practice, and design their own process and impact evaluation plan. Finally, they will examine the concept of evidence and be taught techniques to appraise and synthesise evidence reported in multiple evaluations of a single intervention, as is undertaken in systematic reviews. Complementing earlier modules in the BSc programme, this module draws upon knowledge from various areas, including systems theory, crime pattern analysis, crime prevention, and research methodology.

The module will be delivered over 10 weeks with 3 hours of contact time (lectures/tutorials) per week.

**Key information**
- **Year**: 2018/19
- **Credit value**: 15 (150 study hours)
- **Delivery**: UG L6, Campus-based
- **Reading List**: [View on UCL website](#)
- **Tutor**: [View on UCL website](#)
- **Term**: Term 1
- **Assessment**: Coursework: 100%

**Assessment**
- Coursework: 100%
