Security and Crime Science Research Project (SECU0053)

Description

In this module, students will undertake an independent research project on a crime and/or security-related topic. All projects will be supervised by an academic member of staff. Students will also require ethical approval from the Departmental Research Ethics committee.

Students will be informed of the details and requirements of this module at the end of year 2. They will then be required to approach members of staff to discuss possible research projects. Students can propose their own project ideas but the final decision rests with the supervisor. The project itself will run from the beginning of term 1 to the end of term 2, over which time the student will carry out the research and write up the final report.

There are two points of assessment for this module:

1) A 1,000-word research plan. This document will provide a background to the proposed research project, outline the research question/project objectives, describe the proposed method and forms of analysis, and discuss the expected implications.

2) A 10,000-word final research report. This will be modeled on a journal article where applicable.

Key information

- Year: 2018/19
- Credit value: 30 (300 study hours)
- Delivery: UG L6, Campus-based
- Reading List: View on UCL website
- Tutor
- Term: Term 1
- Timetable: View on UCL website

Assessment

- Individual project: 90%
- Coursework: 10%
