ANTHROPOLOGY, ENVIRONMENT AND DEVELOPMENT MSc / 2019/20 ENTRY

www.ucl.ac.uk/graduate/
Contemporary concerns with environment and development require a combination of biological and social anthropological approaches to examine the ecology of resource use in developing societies. This MSc evaluates the environmental implications and outcomes of these activities in terms of human subsistence and welfare via a systematic, theoretical and methodological training.

**Degree summary**

Drawing on the strengths of our broad-based department and expertise in human ecology, social anthropology and demography, key areas of investigation include: the implications of changing environments for production systems and human welfare, the sustainable use of natural resources in developing countries and the environmental and welfare impacts of changing patterns of resource use with development.

// UCL Anthropology is one of the largest anthropology departments in the UK offering an exceptional breadth of expertise. Our results in the 2008 Research Assessment Exercise and 2014 Research Excellence Framework show that we are the leading broad-based anthropology department in the UK.

// Teaching staff are all actively engaged in research or consultancy work in the area of environment and development. A strong alumni network within the Human Ecology Research Group and dedicated programmes of invited speakers allow for significant networking opportunities.

// Students are also encouraged to take advantage of the wider anthropological community in London.

The programme is delivered through lectures, seminars, group presentations, tutorials, interactive teamwork, video, and film and web based courses. It includes a non-examined weekly seminar series with both internal and invited speakers. Assessment is through essays, seen and unseen examinations, and the research dissertation.

**Degree structure**

Mode: Full-time: 1 year; Part-time: 2 years
Location: London, Bloomsbury

Students undertake modules to the value of 180 credits. The programme consists of three core modules (60 credits), two optional modules (30 credits) and a research dissertation (90 credits).

Please note that the list of modules given here is indicative. This information is published a long time in advance of enrolment and module content and availability is subject to change.

**DISSERTATION/REPORT**

All MSc students undertake an independent research project which culminates in a dissertation of 15,000 words.

The third term is given over to the dissertation project. Students conduct fieldwork for approximately two months. Fieldwork is self-funded and it is usual for students to find their own fieldwork site.
Your career

Graduates of this programme have gone on to a wide range of relevant careers in research, teaching, consultancy, policy and advocacy work in universities, governmental bodies, national and international NGOs and international research organisations such as the CGIAR.

Employability

The Master’s integrates both natural and social science approaches and combines this with training in the methodological and practical dimensions of field work. The interdisciplinary perspective and demonstrable research skills obtained are an ideal training ground for students wishing to work with government, national or international NGOs or conduct further PhD research in the fields of environment and/or development. In addition to specialist knowledge and fieldwork experience, other skills graduates acquire include presentation and IT, research design and development, qualitative and quantitative analysis, project management, team building and leadership, fundraising and critical analysis and evaluation.
Entry requirements

A minimum of an upper second-class Bachelor’s degree in a relevant discipline from a UK university or an overseas qualification of an equivalent standard.

English language proficiency level

If your education has not been conducted in the English language, you will be expected to demonstrate evidence of an adequate level of English proficiency.

The level of English language proficiency for this programme is: Advanced.

Information about the evidence required, acceptable qualifications and test providers is provided at: www.ucl.ac.uk/graduate/english-requirements

Your application

Students are advised to apply as early as possible due to competition for places. Those applying for scholarship funding (particularly overseas applicants) should take note of application deadlines.

When we assess your application we would like to learn:

- why you want to study Anthropology, Environment and Development at graduate level
- why you want to study Anthropology, Environment and Development at UCL
- what particularly attracts you to this programme
- how your personal, academic and professional background meets the demands of a challenging academic environment
- where you would like to go professionally with your degree

Together with essential academic requirements, the personal statement is your opportunity to illustrate whether your reasons for applying to this programme match what the programme will deliver.

There is an application processing fee for this programme of £75 for online applications and £100 for paper applications. Further information can be found at: www.ucl.ac.uk/prospective-students/graduate/taught/application.
