AUDIOLGICAL SCIENCE WITH CLINICAL PRACTICE
MSc / 2019/20 ENTRY

www.ucl.ac.uk/graduate/
Audiological Science with Clinical Practice MSc

The Audiological Science with Clinical Practice MSc is designed to train students from other disciplines as audiologists. This unique two-year programme includes a 12-month clinical placement and provides the core knowledge, skills and clinical competencies necessary for employment as an audiologist and/or hearing aid dispenser.

Degree summary

The programme provides a detailed study of the hearing and balance mechanisms, their structure, function, pathology and assessment.

The successful student will become competent in a wide range of adult hearing assessments and adult hearing amplification and aural rehabilitation. In addition students will acquire skills that will allow them to assist in specialist areas, specifically balance and paediatric hearing assessments.

The UCL Ear Institute is a recognised international centre of excellence for research and training with strong links to the Royal National Throat, Nose and Ear Hospital and other specialised audiology departments in London.

Our programme aims to ensure that graduates are scientifically literate at postgraduate level and clinically competent within an audiology setting, and that graduates from a relevant discipline acquire the knowledge and skills to practise as an audiologist and/or hearing aid dispenser or pursue a research career.

Our programme allows students the opportunity to network with a variety of different professionals, particularly audiologists, and doctors with specialist interests in ENT or audiovestibular medicine.

The programme is delivered through a combination of lectures, seminars, case presentations, tutorials, enquiry-based learning, practical demonstrations and in-service clinical placements within accredited audiology departments in the NHS or private sector.

Assessment (formative and summative) is by essays, case presentations, mini-tests, final written and practical examinations, and dissertation.

Degree structure

Mode: Full-time: 2 years; Part-time: 3 years; Flexible: 3-5 years
Location: London, Bloomsbury

Students undertake modules to the value of 300 credits. The full-time two-year programme consists of eight core modules (120 credits) and a dissertation/report (60 credits) in the first year, and four core clinical modules (120 credits) in the second year.

The postgraduate diploma two-year programme consists of eight core modules (120 credits) in year one, and four core clinical modules (120 credits) in year 2.

Please note that the list of modules given here is indicative. This information is published a long time in advance of enrolment and module content and availability is subject to change.

YEAR ONE COMPULSORY MODULES

Please note: only first-year modules can be taken in flexible mode. The in-service clinical placement modules need to be completed in one year - equivalent to year two of the full-time programme.

- Signals, Systems, Acoustics and the Ear
- Anatomy and Physiology of the Audiovestibular System
- Balance
- Clinical and Professional Practice
- Diagnostic Audiology
- Introduction to Amplification and Aural Rehabilitation
- Paediatric Audiology
- Research Methods and Statistics

YEAR TWO COMPULSORY MODULES

- Clinical Adult Audiovestibular Assessment and Paediatric Hearing Assessment (30 credits)
- Clinical Adult Diagnostics and Auditory Rehabilitation (60 credits)
- Integrative Audiology
- Living with Hearing Loss

RESEARCH PROJECT/REPORT

All students undertake an independent research project which culminates in a dissertation of 10,000 - 12,000 words. This is submitted at the end of year one.
Your career

It is anticipated that the majority of students will seek employment as audiologists within the UK, in both the NHS and private sector. The main area of activity is adult hearing assessment and rehabilitation. As experience is acquired, audiologists might develop an interest and expertise in balance assessment and rehabilitation, paediatric audiology, tinnitus, cochlear implants, middle ear implants, and bone-anchored hearing aids.

With further experience it is anticipated that graduates might also move towards management, research or teaching.

Employability

Although the programme is vocational and career-specific (audiology) some of our graduates have pursued academic careers, completing PhDs and taught doctorates. International students have used the knowledge and skills gained to promote and develop audiological services in their home countries. Graduates will also acquire many transferable skills, for example, excellent communication skills, the ability to work under pressure, the ability to work independently and in teams, and excellent interpersonal and research skills.
Entry requirements

A minimum of an upper second-class UK Bachelor's degree in a relevant discipline or an overseas qualification of an equivalent standard. Candidates who do not meet this requirement but have a minimum of five years’ relevant clinical experience may also be considered.

Students will be expected to meet the requirements of the clinical placement’s human resource department (including satisfactory health clearance and Disclosure Barring Service (DBS) check).

Progression to the clinical placement (second) year will be based on satisfactory academic performance and there being no fitness to practise issues.

English language proficiency level

If your education has not been conducted in the English language, you will be expected to demonstrate evidence of an adequate level of English proficiency.

The level of English language proficiency for this programme is: Advanced.

Information about the evidence required, acceptable qualifications and test providers is provided at:
www.ucl.ac.uk/graduate/english-requirements

Your application

Students are advised to apply as early as possible due to competition for places. Those applying for scholarship funding (particularly overseas applicants) should take note of application deadlines.

When we assess your application we would like to learn:

- why you want to study Audiological Science with Clinical Practice at graduate level
- why you want to study Audiological Science with Clinical Practice at UCL
- what particularly attracts you to the chosen programme
- how your personal, academic and professional background meets the demands of this challenging programme
- where you would like to go professionally with your degree

Together with essential academic requirements, the personal statement is your opportunity to illustrate whether your reasons for applying to this programme match what the programme will deliver.

There is an application processing fee for this programme of £75 for online applications and £100 for paper applications. Further information can be found at:
www.ucl.ac.uk/prospective-students/graduate/taught/application.

FEES AND FUNDING 2019/20 ENTRY

<table>
<thead>
<tr>
<th></th>
<th>UK: £11,060 (FT), £See Fees Note (PT)</th>
<th>EU: £11,060 (FT), £See Fees Note (PT)</th>
<th>Overseas: £25,150 (FT), £See Fees Note (PT)</th>
</tr>
</thead>
</table>

The tuition fees shown are for the year indicated above. Fees for subsequent years may increase or otherwise vary. Further information on fee status, fee increases and the fee schedule can be viewed on the UCL Students website.

Full-time students undertake 180 credits in year one and 120 credits in year two. As such, the fee in year one will be £11,060 (UK/EU) / £25,150 (Overseas) but the fee in year two will be approximately two thirds of that in year one (subject to UCL’s annual fee increase). For part-time students, the full-time fee indicated will be pro-rated based on module selection.

Full details of funding opportunities can be found on the UCL Scholarships website:
www.ucl.ac.uk/scholarships

APPLICATION DEADLINE

All applicants: 26 July 2019
Details on how to apply are available on the website at:
www.ucl.ac.uk/graduate/apply
