Clinical Neurology (by Distance Learning) MSc /

The world’s first distance learning MSc in Clinical Neurology, is led by experts based at Queen Square in London, a world-renowned centre for clinical neurology and neuroscience, and delivered fully online. This programme will enrich and enhance the knowledge and portfolio of doctors with an interest in neurology.

Degree summary
All students will learn the fundamentals of neurological diseases, including stroke, epilepsy, movement disorders, headaches, dementia demyelinating, inflammatory and infectious disorders, and neoplasms of CNS.

As well as acquiring skills for neurological examinations and diagnostics that are applicable in day-to-day clinical practice, MSc students also learn about the principles of clinical research.

This unique Clinical Neurology MSc by distance learning has been developed by neurology experts based at Queen Square, a world-renowned neurological centre, where four of the top 12 most highly-cited authors working worldwide in neuroscience and behaviour work.

With its concentration of clinical and applied scientific activity the UCL Institute of Neurology is a unique national resource for postgraduate training and research in neurology.

A Postgraduate Diploma in Clinical Neurology (by Distance Learning) has been running very successfully since 2012 and has over 80 students enrolled from all over the world. This flexible learning programme enables students to access teaching sessions at any time in any location, through the internet. Flexible timing means that the programme can be completed at a speed suitable for the individual student. The online programme is supplemented by contact with a programme tutor and for the MSc, a research project supervisor based at Queen Square.

Teaching and learning is delivered through online sessions with a multimedia approach and interactive features such as videos, interactive graphs and tables, as well as illustrations and text. Learning through real-world case examples is encouraged. Assessment is through multiple choice questions, structured case reviews, tutor assessments and 10,000-word dissertation.

Degree structure
Mode: Flexible: 1-3 years
Location: Distance learning programme
Students undertake modules to the value of 180 credits. The MSc consists of eight core modules (120 credits), and a research project (60 credits) and starts in September.

The Postgraduate Diploma consists of eight core modules (120 credits).

The Postgraduate Certificate consists of four core basic modules (60 credits).

Please note that the list of modules given here is indicative. This information is published a long time in advance of enrolment and module content and availability is subject to change.

COMPULSORY MODULES
- Stroke, Epilepsy and Rehabilitation – Basic
- Neurodegenerative, Infectious and Inflammatory Diseases of the Nervous System – Basic
- Common Problems in Neurological Practice – Basic
- Neurology and Neurosurgery – Basic
- Stroke, Epilepsy and Rehabilitation – Advanced
- Neurodegenerative, Infectious and Inflammatory Diseases of the Nervous System – Advanced
- Common Problems in Neurology Practice – Advanced
- Neurology and Neurosurgery – Advanced

OPTIONAL MODULES
- Currently we do not have any optional modules

DISSERTATION/REPORT
- All MSc students undertake an independent research project that involves a literature search, writing a systematic review or meta-analysis, based on the principles of critical reading and analysis which culminates in a dissertation of 10,000 words.
Your career

This programme provides an excellent basis for a clinical or research career in clinical neurology and related disciplines.

Employability

Doctors can increase their chances of getting into formal training or research. Qualified neurologists can enhance their international exposure. GPs or physicians and specialists in stroke, geriatrics, psychiatry, and paediatrics can develop their sub-specialist interest in neurology. The Postgraduate Diploma is one of the neurology specialist skills courses for Acute Internal Medicine trainees in the UK.
Entry requirements

A first degree in Medicine with medical registration is required. MSc applicants should also have undertaken a research project, have co-authored a publication in the area of clinical neurology or neuroscience, and explicitly state that they have acquired research skills through an internship, elective placement or similar and submit a written proposal.

English language proficiency level

If your education has not been conducted in the English language, you will be expected to demonstrate evidence of an adequate level of English proficiency.

The level of English language proficiency for this programme is: Standard.

Information about the evidence required, acceptable qualifications and test providers is provided at:
www.ucl.ac.uk/graduate/english-requirements

Your application

When we assess your application we would like to learn:

- Why you want to study Clinical Neurology
- What particularly attracts you to the programme
- How you think you might manage the demands of a distance learning programme
- How this qualification might help you in your future clinical career, bearing in mind that this degree is not a direct entry route into neurology training

Together with essential academic requirements, the personal statement is your opportunity to illustrate whether your reasons for applying to this programme match what the programme will deliver.

There is an application processing fee for this programme of £75 for online applications and £100 for paper applications. Further information can be found at:
www.ucl.ac.uk/prospective-students/graduate/taught/application.

FEES AND FUNDING 2019/20 ENTRY
