Forensic science is a dynamic discipline that is crucial to the investigation of crime, the collection of evidence and intelligence, and in securing justice. This multidisciplinary MSc programme offers students a unique opportunity to gain forensic science skills and methods within a holistic crime science framework.

**Degree summary**

Students will develop an understanding of the fundamental principles of crime and forensic science, together with the key conceptual and philosophical frameworks in this field. They will gain practical skills in crime scene investigation, experimental design and implementation, statistical analysis, data analysis and modelling, and will be able to evaluate the weight and applicability of forensic evidence for investigative and court purposes.

// This MSc will train graduates to think strategically and critically about crime and forensic science, equipping them with transferable skills suitable for a wide range of careers.

// The UCL Jill Dando Institute of Security and Crime Science (JDI) brings together academics from across the physical sciences, social sciences and humanities. Our graduate students come from varied backgrounds; many are practitioners and are encouraged to share their professional experience.

The programme is delivered through lectures, seminars, tutorials, practical exercises and statistical and computer classes. Assessment is through coursework, examination and the dissertation.

**Degree structure**

Mode: Full-time: 1 year
Location: London, Bloomsbury

Students undertake modules to the value of 180 credits. The programme consists of five core modules (75 credits), three optional modules (45 credits) and a research dissertation (60 credits).

An exit-only Postgraduate Diploma (120 credits) is offered.

Please note that the list of modules given here is indicative. This information is published a long time in advance of enrolment and module content and availability is subject to change.

**COMPULSORY MODULES**

- Quantitative Methods
- Designing and Doing Research
- Understanding and Interpreting Forensic Evidence
- Foundations of Security and Crime Science
- Law and Expert Evidence
- Dissertation

**OPTIONAL MODULES**

Students choose three of the following optional modules:

- Case Assessment and Interpretation for Forensic Scientists
- Fundamentals of Molecular Biology
- Information Security Management
- Forensic Anthropology
- Advanced Forensic Anthropology (pre-requisite: Forensic Anthropology)
- Forensic Geoscience
- Frontiers in Experimental Physical Chemistry
- Judgment and Decision Making
- Practices of Crime Scene Investigation and Expert Testimony
- Forensic Biology and DNA Interpretation
- Introduction to Cybersecurity
- Horizon Scanning

**DISSERTATION/REPORT**

- All students undertake an independent research project which culminates in a dissertation of 10,000 words.
Your career

Graduates of this programme will gain the skills necessary for a career in crime investigation, forensic science provision, consultancy, policy-making, and with public sector employers such as police forces, Home Office, and Ministry of Defence. They will also have gained the research tools necessary for a PhD or further doctoral research.

Employability

Graduates from this programme gain a solid understanding of the key principles of crime and forensic science, along with the ability to analyse problems and use appropriate scientific and professional skills to solve them. They can evaluate forensic evidence and their CSI training (developed and delivered with input from London-based police forces) gives them the edge over other applicants for crime scene investigation roles, if this is what they decide to do. They have the opportunity to learn specialist techniques in areas such as forensic archaeology and forensic geoscience, and are given a thorough grounding in academic research methods.
Entry requirements

Normally a minimum of an upper second-class Bachelor’s degree in a relevant discipline from a UK university or an overseas qualification of an equivalent standard. Relevant disciplines will generally include science subjects, for example chemistry, biology, physics, engineering or computer science; psychology, archaeology or geography. Alternatively candidates may qualify for entry if they can offer five or more years of relevant professional experience (for example in the police service, or with a forensic science provider).

English language proficiency level

If your education has not been conducted in the English language, you will be expected to demonstrate evidence of an adequate level of English proficiency.

The level of English language proficiency for this programme is: Good. Information about the evidence required, acceptable qualifications and test providers is provided at: www.ucl.ac.uk/graduate/english-requirements

Your application

Students are advised to apply as early as possible due to competition for places. Those applying for scholarship funding (particularly overseas applicants) should take note of application deadlines.

When we assess your application we would like to learn:

- what particularly attracts you to this particular programme
- why you want to study this subject in the Faculty of Engineering Sciences at UCL, rather than elsewhere
- how your academic and professional background meets the demands of this programme
- if you are aware and comfortable with the fact that the programme includes courses on statistics and quantitative analysis, as well as a general emphasis on the scientific method and empirical research
- where you would like to go professionally with your degree

Together with essential academic requirements, the personal statement is your opportunity to illustrate whether your reasons for applying to this programme match what the programme will deliver.

There is an application processing fee for this programme of £75 for online applications and £100 for paper applications. Further information can be found at: www.ucl.ac.uk/prospective-students/graduate/taught/application.

FEES AND FUNDING 2019/20 ENTRY

// UK: £12,750 (FT)
// EU: £12,750 (FT)
// Overseas: £26,660 (FT)

The tuition fees shown are for the year indicated above. Fees for subsequent years may increase or otherwise vary. Further information on fee status, fee increases and the fee schedule can be viewed on the UCL Students website.

UCL Security & Crime Science is offering up to 14 bursary scholarships of between £2,500 and £10,000 to outstanding applicants who have been offered places on one of our MSc programmes. Further information is available on the departmental website.

Full details of funding opportunities can be found on the UCL Scholarships website: www.ucl.ac.uk/scholarships

APPLICATION DEADLINE

All applicants: 26 July 2019

Details on how to apply are available on the website at: www.ucl.ac.uk/graduate/apply
