Dental Public Health MSc /

The internationally renowned Dental Public Health MSc at UCL offers a challenging and innovative programme of study. Based in UCL Institute of Epidemiology and Health Care, a particular strength of the programme is the focus on exploring the application of public health philosophy to dental public health issues.

Degree summary

You will develop a broad understanding of the philosophy of dental public health, and in particular the underlying social, economic and political determinants of health. You will be able to describe and apply the key principles of the Primary Health Care Approach, and demonstrate an up-to-date knowledge of current concepts and theories.

UCL is one of the world’s pioneering universities with a reputation for high-quality research. Located in the heart of London it is a stimulating and exciting environment in which to study. UCL is ranked 6th in the world for public health (Shanghai Rankings’ Global Ranking of Academic Subjects 2018).

The Institute of Epidemiology and Health Care is a friendly, thriving multidisciplinary environment. Staff, specialising in biology, dentistry, economics, epidemiology, medicine, psychology, public health, statistics and sociology, aim to develop a better understanding of health and prevention of ill health through vigorous research at a global, national and local level. This knowledge is applied via teaching and contributions to national and international health policy and the wider public understanding of health.

The programme is designed to encourage maximum student participation and involvement, and is based upon small group teaching seminars, where a questioning approach is actively encouraged, enabling students to challenge the basis for current dental policy and practice. Assessment is through internal assignments, examination, oral presentation and the research dissertation.

Degree structure

Mode: Full-time: 1 year; Part-time: 2 years; Flexible: 2-5 years
Location: London, Bloomsbury

Students undertake modules to the value of 180 credits. The programme consists of eight compulsory modules (120 credits) and a project report (60 credits).

Please note that the list of modules given here is indicative. This information is published a long time in advance of enrolment and module content and availability is subject to change.

Your career

Many former students have become chief dental officers, dental public health academics and planners in their own countries.

Employability

Many of our completing students go on to work within governing bodies, healthcare institutions and local dentist practices. A large number also go on to academic careers and commence research degrees within their specified areas of interest at various higher education institutes around the world.

Within the UK, several of our past students are now lecturers in dental public health, while others are consultants in dental public health working at Public Health England.
Entry requirements

All applicants must normally hold an approved dental or medical qualification. Applicants must be confident using computers and show evidence of numeracy (e.g. GCSE Mathematics or Statistics).

English language proficiency level

If your education has not been conducted in the English language, you will be expected to demonstrate evidence of an adequate level of English proficiency.

The level of English language proficiency for this programme is: Standard.

Information about the evidence required, acceptable qualifications and test providers is provided at:
www.ucl.ac.uk/graduate/english-requirements

Your application

Students are advised to apply as early as possible due to competition for places. Those applying for scholarship funding (particularly overseas applicants) should take note of application deadlines.

When we assess your application we would like to learn:

- why you want to study Dental Public Health at graduate level
- why you want to study Dental Public Health at UCL
- how your academic and professional background meets the demands of this programme
- where you would like to go professionally with your degree

Together with essential academic requirements, the personal statement is your opportunity to illustrate whether your reasons for applying to this programme match what the programme will deliver.

There is an application processing fee for this programme of £75 for online applications and £100 for paper applications. Further information can be found at:
www.ucl.ac.uk/prospective-students/graduate/taught/application.
