EATING DISORDERS AND CLINICAL NUTRITION MSc / 2019/20 ENTRY

www.ucl.ac.uk/graduate/
This programme, provided by the internationally renowned UCL Division of Medicine, is intended for all professionals wishing to work in the eating disorders field at a high level. The qualifications (MSc, Diploma, Certificate) will appeal to clinicians and scientists who wish to provide treatment, develop services and conduct research in this field.

**Degree summary**

This MSc provides a sound programme in human nutrition covering practical approaches, research methods and nutrition in the general population and in disease states. Eating disorders are presented using different teaching methods with an extensive series of seminars, tutorials and brief clinical attachments at St Ann's, Maudsley and other Hospitals. Students will also undertake a significant research project.

- The field of eating disorders is rapidly developing in terms of service provision and research. This MSc is the only comprehensive graduate programme available in the field, meeting an important clinical and academic need.
- Whether you are a psychiatrist, psychologist, dietitian, nurse or researcher interested in eating disorders affecting adults or children and adolescents, this degree will provide fundamental nutrition education, and an extensive programme on eating disorders delivered in seminars, tutorials, clinical attachments and a major research project.
- The programme fulfils criteria for membership of the Association of Nutrition.

The programme is delivered through a combination of seminars, lectures, laboratory work, and practicals. Assessment is through examination, presentations, essays, practical reports and the dissertation.

**Accreditation**

This MSc is registered with the Association for Nutrition, a professional body that holds the UK Voluntary Register of Nutritionists (UKVRN), a competency-based register of nutritionists. Graduates of this programme will be eligible to apply for direct entry to the UKVRN as Registered Associate Nutritionists.

**Degree structure**

Mode: Full-time: 1 year; Part-time: 2 years
Location: London, Bloomsbury

Teaching takes place all day (9-6pm) on Wednesday & Fridays. Other commitments, including your research project and placement opportunities, take place outside of teaching hours.

Students undertake modules to the value of 180 credits. The programme consists of eight core modules (120 credits), and a research dissertation (60 credits).

A Postgraduate Diploma (120 credits) is offered.
A Postgraduate Certificate (60 credits) is offered.

Please note that the list of modules given here is indicative. This information is published a long time in advance of enrolment and module content and availability is subject to change.

**DISSERTATION/REPORT**

All MSc students undertake an independent research project which culminates in a dissertation of between 10,000-12,000 words.
Your career

For career guidance from this degree please view the Departmental website via the link above.

Employability

This degree will give graduates a clear advantage when applying for clinical and research positions in units in which children, adolescents or adults with eating disorders are assessed, treated and recruited into research programmes. It is particularly relevant for individuals wishing to apply for senior positions in these units, as well as graduates who aspire to studying for a doctorate in the eating disorders field. Surveys have shown that eating disorder services are continuing to develop in all parts of the country, providing substantial opportunities for employment in this burgeoning field.

Students should note that although our degree is very clinically focused, it is not clinical training, and therefore successful graduation does not qualify you to work independently with patients with eating disorders.
Entry requirements

A minimum of an upper second-class Bachelor’s degree in a biological science, medical or healthcare discipline from a UK university or an overseas qualification of an equivalent standard.

English language proficiency level

If your education has not been conducted in the English language, you will be expected to demonstrate evidence of an adequate level of English proficiency.

The level of English language proficiency for this programme is: Standard.

Information about the evidence required, acceptable qualifications and test providers is provided at: www.ucl.ac.uk/graduate/english-requirements

Your application

Students are advised to apply as early as possible due to competition for places. Those applying for scholarship funding (particularly overseas applicants) should take note of application deadlines.

When we assess your application we would like to learn:

- why you want to study Eating Disorders and Clinical Nutrition at graduate level
- why you want to study Eating Disorders and Clinical Nutrition at UCL
- what particularly attracts you to this programme
- how your personal, academic and professional background meets the demands of this challenging programme
- where you would like to go professionally with your degree

Together with essential academic requirements, the personal statement is your opportunity to illustrate whether your reasons for applying to this programme match what the programme will deliver.

There is an application processing fee for this programme of £75 for online applications and £100 for paper applications. Further information can be found at: www.ucl.ac.uk/prospective-students/graduate/taught/application.
