INVESTIGATIVE OPHTHALMOLOGY AND VISION SCIENCE MSc / 2019/20 ENTRY

www.ucl.ac.uk/graduate/
This MSc is aimed at students who wish to extend their knowledge and expertise in the eye as an integrated biological system. The programme provides a unique and integrated review of the physiology and biology of the eye, covering molecular and developmental cell biology, complex genetics, visual neuroscience, stem cells and eye repair.

Degree summary

The programme offers students the opportunity to develop their knowledge and expertise in visual neuroscience, ocular cell biology, genetics, eye development and micro vascular biology in health and disease. Students will learn how this knowledge can be applied to develop novel treatments for eye disease. On completion of the programme, students gain an enhanced knowledge and understanding of scientific communication skills, scientific design and analysis, sophisticated laboratory techniques and valuable research experience.

The UCL Institute of Ophthalmology is one of the premier centres in the world for the study of vision and the mechanisms, diagnosis and therapy of eye disease. We embrace fundamental research, through the entire spectrum of translational medicine to clinical trials.

This MSc programme draws upon the extensive basic and clinical research experience available at the institute and at Moorfields Eye Hospital. Students gain expertise in basic cell biology, genetics, neuroscience and physiology, specialise in the biology of the eye as an integrated biological system and conduct a six-month research project within a world-class research environment.

The programme is delivered through a combination of lectures, seminars, tutorials, problem classes, journal clubs, self-directed studies and laboratory practical courses. Assessment is through long essays, coursework, laboratory practicals, oral examination and the research dissertation.

Degree structure

Mode: Full-time: 1 year
Location: London, Old Street
Students will attend lectures every week during term-time, usually two - three days per week.
Students undertake modules to the value of 180 credits. The programme consists of six compulsory modules (90 credits) and a research project (90 credits).
Please note that the list of modules given here is indicative. This information is published a long time in advance of enrolment and module content and availability is subject to change.

**Your career**

This programme provides excellent preparation for a PhD or a successful research career in academia or for positions in the public or commercial sectors. Previous students have also successfully obtained specialist trainee positions in ophthalmology at hospitals across the country.

**Employability**

The programme aims to train first-class basic and clinical scientists in the field of biology of the eye and vision.
Entry requirements

A minimum of an upper second-class Bachelor’s degree in a relevant discipline from a UK university or an overseas qualification of an equivalent standard.

English language proficiency level

If your education has not been conducted in the English language, you will be expected to demonstrate evidence of an adequate level of English proficiency.

The level of English language proficiency for this programme is: Good. Information about the evidence required, acceptable qualifications and test providers is provided at:

www.ucl.ac.uk/graduate/english-requirements

Your application

Students are advised to apply as early as possible due to competition for places. Those applying for scholarship funding (particularly overseas applicants) should take note of application deadlines.

When we assess your application we would like to learn:

- why you want to study Investigative Ophthalmology and Vision of Science at graduate level
- why you want to study Investigative Ophthalmology and Vision of Science at UCL
- what particularly attracts you to this programme
- how your academic and professional background meets the demands of this programme
- where you would like to go professionally with your degree

Together with essential academic requirements, the personal statement is your opportunity to illustrate whether your reasons for applying to this programme match what the programme will deliver.

There is an application processing fee for this programme of £75 for online applications and £100 for paper applications. Further information can be found at:

www.ucl.ac.uk/prospective-students/graduate/taught/application.

FEES AND FUNDING 2019/20 ENTRY

// UK: £11,060 (FT)
// EU: £11,060 (FT)
// Overseas: £27,040 (FT)

The tuition fees shown are for the year indicated above. Fees for subsequent years may increase or otherwise vary. Further information on fee status, fee increases and the fee schedule can be viewed on the UCL Students website.

Full details of funding opportunities can be found on the UCL Scholarships website: www.ucl.ac.uk/scholarships

APPLICATION DEADLINE

All applicants: 26 July 2019

Details on how to apply are available on the website at:

www.ucl.ac.uk/graduate/apply
