MEDICAL PHYSICS AND BIOMEDICAL ENGINEERING
MRes / 2019/20 ENTRY

www.ucl.ac.uk/graduate/
The Medical Physics and Biomedical Engineering MRes provides structured training in this diverse and multidisciplinary field. Students may subsequently progress to an MPhil/PhD as part of a Doctoral Training Programme.

**Degree summary**

The programme covers all forms of ionising and non-ionising radiation commonly used in medicine and applies it to the areas of imaging and treatment. The programme involves Master's-level modules chosen from a wide range offered by the department, and a research project. Good performance in the MRes will lead to entry into the second year of the Doctoral Training Programme where the research project is continued.

UCL Medical Physics & Biomedical Engineering is one of the largest medical physics and bioengineering departments in Europe, with links to a large number of active teaching hospitals. We have arguably the widest range of research of any similar department, and work closely with other world-leading institutions.

Join an interactive network of researchers across many disciplines and benefit from the strengths of UCL in the healthcare field.

**Degree structure**

Mode: Full-time: 1 year; Part-time: 2 years

Location: London, Bloomsbury

Students undertake modules to the value of 180 credits. The programme consists of four optional modules (15 credits each) and a research project (120 credits).

Please note that the list of modules given here is indicative. This information is published a long time in advance of enrolment and module content and availability is subject to change.

**COMPULSORY MODULES**
- There are no core modules for this programme.

**OPTIONAL MODULES**
- Students choose four optional modules from the following:
  - Ionising Radiation Physics: Interactions and Dosimetry
  - Medical Imaging
  - Clinical Practice
  - Treatment with Ionising Radiation
  - Medical Electronics and Control
  - Bioengineering
  - Optics in Medicine
  - Computing in Medicine
  - Medical Devices and Applications
  - Foundations and Anatomy and Scientific Computing
  - Image Processing
  - Computational Modelling in Biomedical Imaging
  - Programming Foundations for Medical Image Analysis
  - Information Processing in Medical Imaging

**DISSERTATION/REPORT**
- All students undertake a research project.
Your career
Our graduates typically work in academia, clinical science and the NHS, and in industry.

Employability
This programme gives students a good grounding in basic research training in a focused topic. Graduates will be ideally suited to enter PhD programmes in a variety of subject areas or enter professions requiring a postgraduate Master's qualification.
Entry requirements

A minimum of an upper second-class Bachelor's degree in a relevant discipline from a UK university, or an overseas qualification of an equivalent standard.

English language proficiency level

If your education has not been conducted in the English language, you will be expected to demonstrate evidence of an adequate level of English proficiency.

The level of English language proficiency for this programme is: Standard.

Information about the evidence required, acceptable qualifications and test providers is provided at:
www.ucl.ac.uk/graduate/english-requirements

Your application

Students are advised to apply as early as possible due to competition for places. Those applying for scholarship funding (particularly overseas applicants) should take note of application deadlines.

When we assess your application we would like to learn:

- why you want to study Medical Physics and Biomedical Engineering at graduate level
- why you want to study Medical Physics and Biomedical Engineering at UCL
- what particularly attracts you to this programme
- how your personal, academic and professional background meets the demands of a challenging programme
- where you would like to go professionally with your degree

Together with essential academic requirements, the personal statement is your opportunity to illustrate whether your reasons for applying to this programme match what the programme will deliver.

FEES AND FUNDING 2019/20 ENTRY

|| UK: £5,210 (FT), £2,605 (PT) ||
|---|---|
| EU: £5,210 (FT), £2,605 (PT) |
| Overseas: £24,450 (FT), £12,510 (PT) |

The tuition fees shown are for the year indicated above. Fees for subsequent years may increase or otherwise vary. Further information on fee status, fee increases and the fee schedule can be viewed on the UCL Students website.

Full details of funding opportunities can be found on the UCL Scholarships website: www.ucl.ac.uk/scholarships

APPLICATION DEADLINE

All applicants: 26 July 2019

Details on how to apply are available on the website at: www.ucl.ac.uk/graduate/apply
