PROSTHODONTICS
MClInDent / 2019/20 ENTRY

www.ucl.ac.uk/graduate/
This is a full-time two-year, or part-time three-year Master's programme comprising theoretical instruction, practical work and personal research.

Degree summary

The programme offers practical experience in advanced conservation, fixed (conventionally prepared and resin-retained designs) and removable prosthodontics, and implant-supported prostheses for single missing teeth, partial or completely edentulous cases, alongside an introduction to occlusion and the range of diagnostic procedures required to ensure effective planning and design of oral reconstructions. Trainees are also introduced to digital workflows in dentistry. Please note that the module structure and assessments are under review with the scope of merging some modules and reducing the assessments, aligning ILOs and improving the learning experience and content. The new changes will take place during the 2019-20 academic year and complete module information will be updated when approved.

The programme offers an intensive programme with a strong practical emphasis. Students benefit from first-class facilities which provide unique, seamless training in specialist dentistry, including practical classes in the operative technique laboratory. Approximately two-thirds of the programme is allocated to clinical and laboratory work for patients.

The programme is delivered through one-to-one clinical and laboratory instruction, seminar teaching, lectures, journal club, individual work including a research project, self-directed learning and problem-based learning.

Degree structure

Mode: Full-time: 2 years; Part-time: 3 years
Location: London, Bloomsbury

Students undertake modules to the value of 360 credits. All modules are compulsory. Year one consists of core modules (180 credits). Year two consists of core modules (90 credits), and a dissertation (90 credits). Year three (Speciality/Advanced Training only) is not credit bearing.

Please note that the list of modules given here is indicative. This information is published a long time in advance of enrolment and module content and availability is subject to change.

COMPULSORY MODULES
- Interdisciplinary Aspects of Restorative Treatment
- Principles of Treatment Core Module (Conservative Dentistry, Implant Dentistry, Prosthodontics) and Removable Prosthodontics-Phantom Head
- Fundamentals of Fixed and Implant Prosthodontics
- Fundamentals of Removable Prosthodontics
- Prosthodontic Treatment Planning and Functional Occlusion
- Prosthodontic Clinical and Laboratory Care I
- Advanced Restorative Seminars - Clinical Log Book I and Case Reports I
- Prosthodontic Operative Dentistry and Endodontics

OPTIONAL MODULES
- There are no optional modules for this programme.

DISSERTATION/REPORT
- All students undertake an independent research project in year two which culminates in a dissertation of approximately 13,000-15,000 words.
Your career

The majority of graduates continue their progression to gain entry to the prosthodontic specialist list. Following that career trajectories include Specialist private practice, hospital, or academic placements.
Entry requirements

All applicants must hold an approved dental qualification and have a minimum of two years’ clinical experience post-qualification.

English language proficiency level

If your education has not been conducted in the English language, you will be expected to demonstrate evidence of an adequate level of English proficiency.

The level of English language proficiency for this programme is: Good.

Information about the evidence required, acceptable qualifications and test providers is provided at:
www.ucl.ac.uk/graduate/english-requirements

Your application

Students are advised to apply as early as possible due to competition for places. Those applying for scholarship funding (particularly overseas applicants) should take note of application deadlines.

When we assess your application we would like to learn:

- how your academic and professional background meets the demands of this programme
- why you want to study prosthodontics at graduate level
- what particularly attracts you to this programme
- where you would like to go professionally with your degree and how this programme meets your needs.

Together with essential academic requirements, the personal statement is your opportunity to illustrate whether your reasons for applying to this programme match what the programme will deliver.

There is an application processing fee for Eastman Dental Institute programmes of £110 for online applications and £135 for paper applications. Further information can be found at:
www.ucl.ac.uk/prospective-students/graduate/taught/application.

FEES AND FUNDING 2019/20 ENTRY

// UK: £27,470 (FT), £18,790 (PT)
// EU: £27,470 (FT), £18,790 (PT)
// Overseas: £46,610 (FT), £35,470 (PT)

The tuition fees shown are for the year indicated above. Fees for subsequent years may increase or otherwise vary. Further information on fee status, fee increases and the fee schedule can be viewed on the UCL Students website.

Fee deposits for this programme are as follows: UK/EU full-time and part-time students £2,500; Overseas full-time and part-time students £5,000.

Full details of funding opportunities can be found on the UCL Scholarships website: www.ucl.ac.uk/scholarships

APPLICATION DEADLINE

All applicants: 7 January 2019

Details on how to apply are available on the website at:
www.ucl.ac.uk/graduate/apply
