Degree structure

In each year of your degree you will take a number of individual modules, normally valued at 15 or 30 credits, adding up to a total of 120 credits for the year. Modules are assessed in the academic year in which they are taken. The balance of compulsory and optional modules varies from programme to programme and year to year. A 30-credit module is considered equivalent to 15 credits in the European Credit Transfer System (ECTS).

You will take compulsory modules in economics and business in years one and two, with a compulsory dissertation in your final year. In each of these years you will choose the remainder of your modules from options in economics, politics, sociology, international relations, mathematical and statistical methodology and language.

You have the opportunity to learn a SSEES language, with a view to spending your year abroad in a country of the region. Not only will you be able to make use of our excellent language teaching resources, but you will also have access to the foreign language resources of the SSEES Library.

Your third year is spent abroad studying at a university in the region. During your year abroad you will be expected to develop your language skills where appropriate, to take modules (in English) related to your degree and to develop an enhanced understanding of relevant country-level issues.

Upon successful completion of 360 credits, you will be awarded a BA (Hons) in Economics and Business with East European Studies with a Year Abroad.
