MATHEMATICS WITH MANAGEMENT STUDIES MSci / UCAS CODE: G1NF 2021 ENTRY

www.ucl.ac.uk/prospectus
This MSci offers an additional year of study on top of the equivalent BSc, during which students have the opportunity to specialise further by taking more advanced modules, and undertaking a major project. No previous knowledge of management studies is required.

**Key information**

**Programme starts**
September 2021

**Location**
London, Bloomsbury

**Degree benefits**

// All of the modules given by the UCL School of Management are validated by external experts from the private, public and charitable sectors.

// Many of our graduates choose to build their management knowledge and experience by taking a further management qualification, such as the MBA (Master of Business Administration).

// Highly regarded (15th in Times Higher Education World University Rankings by Subject, 2020) UCL Mathematics is home to world-leading researchers in a wide range of fields, especially geometry, spectral theory, number theory, fluid dynamics and mathematical modelling.

// Three of the six British winners of the Fields medal (the mathematician’s equivalent of the Nobel Prize) have associations with the department.

**Degree structure**

In each year of your degree you will take a number of individual modules, normally valued at 15 or 30 credits, adding up to a total of 120 credits for the year. Modules are assessed in the academic year in which they are taken. The balance of compulsory and optional modules varies from programme to programme and year to year. A 30-credit module is considered equivalent to 15 credits in the European Credit Transfer System (ECTS).

In the first two years you will receive a thorough grounding in pure mathematics and mathematical methods following the same modules as the single-subject Mathematics students, taking 3.0 credits of pure mathematics/mathematical methods each year. In place of the Applied Mathematics modules you will take two half-credit modules in management studies each year. Having laid the basic foundations there is a wide range of options in both mathematics and management studies in the third and fourth years. You will undertake a major project in your fourth year, which will include a substantial piece of written work and a presentation.

This programme is offered as a three-year BSc or a four-year MSci degree. The first two years of the programme are identical, and students are advised to apply for the MSci degree in the first instance, as it is possible to transfer to the BSc during the first three years.

Upon successful completion of 480 credits, you will be awarded a MSci (Hons) in Mathematics with Management Studies.

Please note that the list of modules given here is indicative. This information is published a long time in advance of enrolment and module content and availability is subject to change.

### YEAR ONE

**Compulsory module(s)**

// Mathematics modules:
- Algebra 1
- Algebra 2
- Analysis 1
- Analysis 2
- Mathematical Methods 1
- Mathematical Methods 2

// Management modules:
- Communication and Behaviour in Organisations
- Understanding Management

**Optional modules**

// All first year modules are compulsory.

### YEAR TWO

**Compulsory module(s)**

// Mathematics modules:
- Algebra 3: Further Linear Algebra
- Analysis 3: Complex Analysis
- Mathematical Methods 3

// Management modules:
- Accounting for Business
- Business in a Competitive Environment

**Optional modules**

// You will select three of the following:
- Algebra 4: Groups and Rings
- Analysis 4: Real Analysis
- Computational Methods
- Geometry and Groups
- Mathematical Methods 4
- Number Theory
- Probability and Statistics

// One of the modules may be replaced by a half-credit outside option, subject to departmental approval.
YEAR THREE

Compulsory module(s)

- Project, Programme and Portfolio Management

Optional modules

- You will select:
  - 2.0 credits of designated third-year mathematics options
  - 0.5 credits of standard management options
  - 1.0 credit of third-year mathematics or suitable management or approved outside options

FINAL YEAR

Compulsory module(s)

- Project in Mathematics

Optional modules

- You will select:
  - 1.0 credit of fourth-year mathematics options
  - 1.0 credit of suitable management options
  - 1.0 credit of third- or fourth-year mathematics or suitable fourth-year management or approved outside options.

Your learning

Teaching is mainly carried out through lectures and small-group tutorials. Problem classes allow you to exercise the skills you have learned. In addition, an "office hours" system for each programme allows you to meet with tutors on a one-to-one basis to review parts of the degree that you find interesting or need clarifying. A Student Mentor scheme runs in the department offering support and advice to first-years.

Assessment

Most modules are assessed by two-hour written examinations in the third term, with a small element (10%) of coursework assessment.

Accessibility

Details of the accessibility of UCL buildings can be obtained from AccessAble. Further information can also be obtained from the UCL Student Support & Wellbeing team.

Your career

We aim to develop your skills in mathematical reasoning, problem-solving and accurate mathematical manipulation. You will also learn to handle abstract concepts and to think critically, argue logically and express yourself clearly.

A mathematics degree is highly valued by employers due to the skills in logical thinking, analysis, problem-solving and, of course, numeracy, that it develops.

Your application

Application for admission should be made through UCAS (the Universities and Colleges Admissions Service). Applicants currently at school or college will be provided with advice on the process; however, applicants who have left school or who are based outside the United Kingdom may obtain information directly from UCAS.

In addition to academic requirements, we expect you to demonstrate an understanding and enjoyment of the subject beyond the examined syllabus, through your reading and involvement in problem-solving activities. Evidence of your curiosity and perseverance in tackling puzzles, and your enjoyment of logical and abstract thinking, should be shown in your application.
**Entry requirements**

**A LEVELS**

**GCSE:** English Language and Mathematics at grade C or 5. For UK-based students, a grade C or 5 or equivalent in a foreign language (other than Ancient Greek, Biblical Hebrew or Latin) is required. UCL provides opportunities to meet the foreign language requirement following enrolment, further details at: www.ucl.ac.uk/ug-reqs.

**Contextual Offer:** A*A*B. A*A*B with A*A* in Maths and Further Mathematics

**GCSE:** English Language and Mathematics at grade C or 5. For UK-based students, a grade C or 5 or equivalent in a foreign language (other than Ancient Greek, Biblical Hebrew or Latin) is required. UCL provides opportunities to meet the foreign language requirement following enrolment, further details at: www.ucl.ac.uk/ug-reqs.

**IB DIPLOMA**

**Standard Offer:** 40 points. A score of 40 points overall with 20 points in three higher level subjects including 7 in Mathematics, or 39 overall with 19 points in three higher level subjects including 7 in Mathematics and a 2 in any STEP paper or a distinction in Mathematics AEA, with no higher level below 5.

**Contextual Offer:** 39 points. A score of 19 points in three higher level subjects including 7 in Mathematics

**CONTEXTUAL OFFERS – ACCESS UCL SCHEME**

As part of our commitment to increasing participation from underrepresented groups, students may be eligible for a contextual offer as part of the Access UCL scheme. For more information see: www.ucl.ac.uk/prospectus.

**OTHER QUALIFICATIONS**

UCL considers a wide range of UK and international qualifications for entry into its undergraduate programmes. Full details are given at: www.ucl.ac.uk/otherquals.

**UNDERGRADUATE PREPARATORY CERTIFICATES (International foundation courses)**

UCL Undergraduate Preparatory Certificates (UPCs) are intensive one-year foundation courses for international students of high academic potential who are aiming to gain access to undergraduate degree programmes at UCL and other top UK universities.

Typical UPC students will be high achievers in a 12-year school system which does not meet the standard required for direct entry to UCL.

For more information see: www.ucl.ac.uk/upc.

**TUITION FEES**

The fees indicated are for undergraduate entry in the 2021/22 academic year. The UK fees shown are for the first year of the programme at UCL only. Fees for future years may be subject to an inflationary increase. The Overseas fees shown are the fees that will be charged to 2021/22 entrants for each year of study on the programme, unless otherwise indicated below.

- **UK:** £9,250 (2021/22)
- **Overseas:** £28,500 (2021/22)

Full details of UCL’s tuition fees, tuition fee policy and potential increases to fees can be found on the [UCL Students website](https://www.ucl.ac.uk/ug-reqs).

**ADDITIONAL COSTS**

This programme does not have any additional costs outside of purchasing books or stationery, printing, thesis binding or photocopying.

A guide including rough estimates for these and other living expenses is included on the UCL Fees and funding pages. If you are concerned by potential additional costs for books, equipment, etc., please get in touch with the relevant departmental contact (details given on this page).

**FUNDING**

Various funding options are available, including student loans, scholarships and bursaries. UK students whose household income falls below a certain level may also be eligible for a non-repayable bursary or for certain scholarships. Please see the [Fees and funding pages](https://www.ucl.ac.uk/ug-reqs) for more details.
