MATHEMATICS WITH MODERN LANGUAGES MSci / UCAS CODE: G1TX 2020 ENTRY

www.ucl.ac.uk/prospectus
This four-year programme offers an additional year of study on top of the Mathematics with Modern Languages BSc, during which students have the opportunity to specialise further by taking more advanced modules, and undertaking a major project.

**Key information**

**Programme starts**
September 2020

**Location**
London, Bloomsbury

**Degree benefits**

- The MSci allows for additional in-depth study, providing the skills necessary for academic research in mathematics or into employment where mathematics is directly involved.
- The UCL Centre for Languages & International Education (CLIE) offers the latest language-learning technology and resources, providing access to almost 10,000 online recordings, including films, television, documentaries, lectures, language exercises and audio-visual material.
- Seven main languages - Arabic, French, German, Italian, Japanese, Mandarin and Spanish - are available for study and all levels of competence can be catered for.
- It is possible to study a programme leading to a qualification in TEFL (Teaching English as a Foreign Language). General modules in European Studies may also be available.

**Degree structure**

In each year of your degree you will take a number of individual modules, normally valued at 15 or 30 credits, adding up to a total of 120 credits for the year. Modules are assessed in the academic year in which they are taken. The balance of compulsory and optional modules varies from programme to programme and year to year. A 30-credit module is considered equivalent to 15 credits in the European Credit Transfer System (ECTS).

In the first two years, you will receive a thorough grounding in pure mathematics and mathematical methods, following the same modules as the single-subject Mathematics students taking 3.0 credits a year. In place of the applied mathematics modules you will take 1.0 credit in modern languages each year. Having laid the basic foundations there is a wide range of options in both mathematics and languages in the third and fourth years. The fourth year also includes a major project. Alongside the seven main languages, you may be able to study other languages such as Dutch, Hebrew, Portuguese, Scandinavian and Slavonic languages.

Language modules are offered at seven levels from complete beginner’s (level 1) to advanced (level 4) and post A level (levels 5-7). Each student is expected to study at least one language to level 4, and you are encouraged to study other languages in addition.

This programme is offered as a three-year BSc or a four-year MSci degree. The first two years of the programme are identical, and students are advised to apply for the MSci degree in the first instance, as it is possible to transfer to the BSc during the first three years.

**YEAR ONE**

**Core or compulsory module(s)**

- Algebra 1
- Algebra 2
- Analysis 1
- Analysis 2
- Mathematical Methods 1
- Mathematical Methods 2

**Optional modules**

- You will select 1.0 credit of modules in your chosen language(s).

**YEAR TWO**

**Core or compulsory module(s)**

- Algebra 3: Further Linear Algebra
- Analysis 3: Complex Analysis
- Mathematical Methods 3

**Optional modules**

- You will select three of the following modules:
  - Algebra 4: Groups and Rings
  - Analysis 4: Real Analysis
  - Computational Methods
  - Geometry and Groups
  - Mathematical Methods 4
  - Number Theory
  - Probability and Statistics
- One of the modules may be replaced by a half-credit outside option, subject to departmental approval.
- You will also select 1.0 credit of modules in your chosen language(s).
YEAR THREE

Core or compulsory module(s)
- All third-year modules are optional.
- Currently available mathematics options are described on the UCL Mathematics website.

Optional modules
- You will select:
  - 2.0 credits of third-year mathematics designated options
  - 1.0 credit of language options
  - 1.0 credit of third-year mathematics options or suitable languages or approved outside options

FINAL YEAR

Core or compulsory module(s)
- Project in Mathematics

Optional modules
- You will select:
  - 1.0 credits of fourth-year mathematics options
  - 1.0 credit of suitable languages options
  - 1.0 credit of third- or fourth-year mathematics or suitable languages or approved outside options

Your learning
Teaching is mainly carried out through lectures and small-group tutorials. Problem classes allow you to exercise the skills you have learned. In addition, an 'office hours' system for each course allows you to meet with tutors on a one-to-one basis to review parts of the course you find interesting or need clarifying. A Student Mentor scheme runs in the department offering support and advice to first-years.

Assessment
Most modules are assessed by two-hour written examinations in the third term, with a small element (10%) of coursework assessment.

Your career
We aim to develop your skills in mathematical reasoning, problem-solving and accurate mathematical manipulation. You will also learn to handle abstract concepts and to think critically, argue logically and express yourself clearly.

A mathematics degree is highly valued by employers due to the skills in logical thinking, analysis, problem-solving and, of course, numeracy, that it develops.

Your application
Application for admission should be made through UCAS (the Universities and Colleges Admissions Service). Applicants currently at school or college will be provided with advice on the process; however, applicants who have left school or who are based outside the United Kingdom may obtain information directly from UCAS.

In addition to academic requirements, we expect you to demonstrate an understanding and enjoyment of the subject beyond the examined syllabus, through your reading and involvement in problem-solving activities. Evidence of your curiosity and perseverance in tackling puzzles, and your enjoyment of logical and abstract thinking, should be shown in your application.
Entry requirements

A LEVELS

GCSE

English Language and Mathematics at grade C or 5. For UK-based students, a grade C or 5 or equivalent in a foreign language (other than Ancient Greek, Biblical Hebrew or Latin) is required. UCL provides opportunities to meet the foreign language requirement following enrolment, further details at: www.ucl.ac.uk/ug-reqs

IB DIPLOMA

**Standard Offer:** 39 points. A score of 20 points in three higher level subjects including 7 in Mathematics, or 19 points in three higher level subjects including 7 in Mathematics and a 2 in any STEP paper or a distinction in Mathematics AEA, with no score below 5.

**Contextual Offer:** 39 points. A score of 19 points in three higher level subjects including 7 in Mathematics

CONTEXTUAL OFFERS – ACCESS UCL SCHEME

As part of our commitment to increasing participation from underrepresented groups, students may be eligible for a contextual offer as part of the Access UCL scheme. For more information see www.ucl.ac.uk/prospectus

OTHER QUALIFICATIONS

UCL considers a wide range of UK and international qualifications for entry into its undergraduate programmes. Full details are given at: www.ucl.ac.uk/otherquals

UNDERGRADUATE PREPARATORY CERTIFICATES (International foundation courses)

UCL Undergraduate Preparatory Certificates (UPCs) are intensive one-year foundation courses for international students of high academic potential who are aiming to gain access to undergraduate degree programmes at UCL and other top UK universities.

Typical UPC students will be high achievers in a 12-year school system which does not meet the standard required for direct entry to UCL.

For more information see: www.ucl.ac.uk/upc.

TUITION FEES

The fees indicated are for undergraduate entry in the 2020/21 academic year. The UK/EU fees shown are for the first year of the programme at UCL only. Fees for future years may be subject to an inflationary increase. The Overseas fees shown are the fees that will be charged to 2020/21 entrants for each year of study on the programme, unless otherwise indicated below.

// UK & EU: £9,250 (2020/21)

// Overseas: £25,110 (2020/21)

Full details of UCL’s tuition fees, tuition fee policy and potential increases to fees can be found on the UCL Students website.

FUNDING

Various funding options are available, including student loans, scholarships and bursaries. UK students whose household income falls below a certain level may also be eligible for a non-repayable bursary or for certain scholarships. Please see the Fees and funding pages for more details.
