MATHEMATICS AND STATISTICAL SCIENCE BSc /
UCAS CODE: GG13
2022 ENTRY

www.ucl.ac.uk/prospectus
This three-year programme is designed for students with an interest in the powerful applications of statistics who also wish to develop their mathematical knowledge and explore the interactions between the two subjects. No previous knowledge of statistics is required.

Key information

Programme starts
September 2022

Location
London, Bloomsbury

Degree benefits

// The programme is an excellent preparation for becoming a professional statistician or an actuary.

// The programme is accredited by the Royal Statistical Society. On application to the society, graduates are awarded Graduate Statistician status provided that at least second-class Honours has been obtained.

// Internationally renowned (16th in Times Higher Education World University Rankings by Subject, 2021) UCL Mathematics is home to world-leading researchers in a wide range of fields, especially geometry, spectral theory, number theory, fluid dynamics and mathematical modelling.

// Three of the six British winners of the Fields medal (the mathematician’s equivalent of the Nobel Prize) have associations with the department.

Accreditation
This programme is accredited by the Royal Statistical Society up until 2022/23. On application to the Royal Statistical Society, graduates are awarded Graduate Statistician (GradStat) status, providing formal recognition of a member’s statistical qualifications.

Degree structure

In each year of your degree you will take a number of individual modules, normally valued at 15 or 30 credits, adding up to a total of 120 credits for the year. Modules are assessed in the academic year in which they are taken. The balance of compulsory and optional modules varies from programme to programme and year to year. A 30-credit module is considered equivalent to 15 credits in the European Credit Transfer System (ECTS).

In the first and second years of the programme you will take a balanced selection of modules in both UCL Mathematics and UCL Statistical Science. Having laid the basic foundations there is a wide range of options in both subjects in the third year of the degree.

Statistics will include much practical work while the mathematics will cover the theoretical aspects of the pure mathematics required to sustain and understand this.

This programme is offered as a three-year BSc or a four-year MSci degree. The first two years of the programme are identical, and students are advised to apply for the MSci degree in the first instance, as it is possible to transfer to the BSc during the first three years.

Upon successful completion of 360 credits, you will be awarded a BSc (Hons) in Mathematics and Statistical Science.

Please note that the list of modules given here is indicative. This information is published a long time in advance of enrolment and module content and availability is subject to change.

YEAR ONE

Compulsory module(s)

// Mathematics modules:
  - Algebra 1
  - Analysis 1
  - Analysis 2
  - Mathematical Methods 1
  - Mathematical Methods 2

// Statistical science modules:
  - Introduction to Practical Statistics
  - Introduction to Probability and Statistics
  - Further Probability and Statistics

YEAR TWO

Compulsory module(s)

// Mathematics modules:
  - Algebra 2
  - Analysis 3: Complex Analysis
  - Analysis 4: Real Analysis

// Statistical science modules:
  - Computing for Practical Statistics
  - Introduction To Applied Probability
  - Linear Models and the Analysis of Variance
  - Probability and Inference

Optional modules

// You will select one of the following half-credit statistical science modules:
  - Optimization Algorithms in Operations Research
  - Social Statistics
**FINAL YEAR**

**Compulsory module(s)**
- Statistical Inference

**Optional modules**
- You will select:
  - 3.5 credits of third-year mathematics and statistical science options, including at least 1.0 credit from mathematics and 0.5 credits from statistical science.
  - Currently available mathematics options are described on the UCL Mathematics website.
  - Up to 0.5 credits may be replaced by an outside option, subject to departmental approval.

---

**Your learning**

Teaching is mainly carried out through lectures and small-group tutorials. Problem classes allow you to exercise the skills you have learned. In addition, an 'office hours' system for each programme allows you to meet with tutors on a one-to-one basis to review parts of the degree that you find interesting or need clarifying. A Student Mentor scheme runs in the department offering support and advice to first-years.

**Assessment**
Most modules are assessed by two-hour written examinations in the third term, with a small element (10%) of coursework assessment.

**Accessibility**
Details of the accessibility of UCL buildings can be obtained from AccessAble. Further information can also be obtained from the UCL Student Support & Wellbeing team.

---

**Your career**
We aim to develop your skills in mathematical reasoning, problem-solving and accurate mathematical manipulation. You will also learn to handle abstract concepts and to think critically, argue logically and express yourself clearly.

A mathematics degree is highly valued by employers due to the skills in logical thinking, analysis, problem-solving and, of course, numeracy, that it develops.

---

**Your application**
Application for admission should be made through UCAS (the Universities and Colleges Admissions Service). Applicants currently at school or college will be provided with advice on the process; however, applicants who have left school or who are based outside the United Kingdom may obtain information directly from UCAS.

In addition to academic requirements, we expect you to demonstrate an understanding and enjoyment of the subject beyond the examined syllabus, through your reading and involvement in problem-solving activities. Evidence of your curiosity and perseverance in tackling puzzles, and your enjoyment of logical and abstract thinking, should be shown in your application.
Entry requirements

**A levels**

*GCSE:* English Language and Mathematics at grade C or 5.

*GCSE:* English Language and Mathematics at grade C or 5.

**IB Diploma**

*Standard Offer:* 40 points. A total of 40 points overall with 20 points in three higher level subjects including 7 in Mathematics, or 39 overall with 19 points in three higher level subjects including 7 in Mathematics and a 2 in any STEP paper or a distinction in Mathematics AEA. with no higher level below 5. The programme will accept higher level 'Mathematics: Analysis and Approaches' only.

*Contextual Offer:* 39 points. A total of 19 points in three higher level subjects including 7 in Mathematics. The programme will accept higher level 'Mathematics: Analysis and Approaches' only.

**Contextual offers – Access UCL scheme**

As part of our commitment to increasing participation from underrepresented groups, students may be eligible for a contextual offer as part of the Access UCL scheme. For more information see ucl.ac.uk/prospectus.

**Other qualifications**

UCL considers a wide range of UK and international qualifications for entry into its undergraduate programmes. Full details are given at: ucl.ac.uk/prospective-students/undergraduate/how-apply/entry-requirements.

**English language requirements**

If your education has not been conducted in the English language, you will be expected to demonstrate evidence of an adequate level of English proficiency. Information about the evidence required, acceptable qualifications and test providers can be found on our English language requirements page.

The English language level for this programme is: Standard

A variety of English language programmes are offered at the UCL Centre for Languages & International Education.

**Undergraduate Preparatory Certificates (International foundation courses)**

UCL Undergraduate Preparatory Certificates (UPCs) are intensive one-year foundation courses for international students of high academic potential who are aiming to gain access to undergraduate degree programmes at UCL and other top UK universities.

Typical UPC students will be high achievers in a 12-year school system which does not meet the standard required for direct entry to UCL.

For more information see: ucl.ac.uk/upc.

---

**Tuition fees**

The fees indicated are for undergraduate entry in the 2021/22 academic year. The UK fees shown are for the first year of the programme at UCL only. Fees for future years may be subject to an inflationary increase. The Overseas fees shown are the fees that will be charged to 2021/22 entrants for each year of study on the programme, unless otherwise indicated below. Fees for the 2022/23 academic year will be advertised as soon as they are available.

- **UK:** £9,250 (2021/22)
- **Overseas:** £28,500 (2021/22)

Full details of UCL’s tuition fees, tuition fee policy and potential increases to fees can be found on the UCL Students website: ucl.ac.uk/students/fees.

**Additional costs**

This programme does not have any additional costs outside of purchasing books or stationery, printing, thesis binding or photocopying.

A guide including rough estimates for these and other living expenses is included on the UCL Fees and funding pages. If you are concerned by potential additional costs for books, equipment, etc., please get in touch with the relevant departmental contact (details given on this page).

**Funding**

Various funding options are available, including student loans, scholarships and bursaries. UK students whose household income falls below a certain level may also be eligible for a non-repayable bursary or for certain scholarships. Please see the Fees and funding pages for more details.

**Contact**

Dr Robert Bowles

*Email:* admissions@math.ucl.ac.uk

*Telephone:* Department: Mathematics
