THEORETICAL PHYSICS BSc / UCAS CODE: F340
2021 ENTRY

www.ucl.ac.uk/prospectus
Theoretical Physics BSc /

This three-year programme offers a variant of the advanced study offered in the Physics BSc. You will develop specialised knowledge of the theoretical structure of the core topics in physics. The programme is likely to appeal to you if you have a strong interest and ability in mathematics.

Key information

Programme starts
September 2021

Location
London, Bloomsbury

Degree benefits

// A science degree from UCL is a strong asset across the whole range of careers where basic scientific skills are required, from accountancy to astrophysics, and computing to cryogenics.

// The programme is accredited by the Institute of Physics (IOP) and includes the very latest developments and discoveries in the field, based on our highly rated research.

// Collaborative links with both industry and international research laboratories provide insight into the practical application of your studies.

// A wide range of optional modules are available, including modules from other University of London colleges, which allows for individual preferences and specialisations within your degree.

Accreditation

This programme is accredited by the Institute of Physics. Holders of accredited degrees can follow a route to Institute of Physics membership and the Chartered Physicist (CPhys) professional qualification.

Graduates of accredited Integrated Master’s (MPhys or MSci) degrees have fulfilled the educational requirements for CPhys status, while graduates of accredited Bachelor’s (BSc) degrees have partially fulfilled these requirements.

Degree structure

In each year of your degree you will take a number of individual modules, normally valued at 15 or 30 credits, adding up to a total of 120 credits for the year. Modules are assessed in the academic year in which they are taken. The balance of compulsory and optional modules varies from programme to programme and year to year. A 30-credit module is considered equivalent to 15 credits in the European Credit Transfer System (ECTS).

Compulsory modules in the first year provide a firm foundation in quantum and classical physics, underpinned by mathematics and a practical skills module which includes computing skills training. You will also take a module in practical mathematics.

The second year includes compulsory modules in quantum physics and its application to atoms and molecules, in statistical thermodynamics and in electromagnetic theory, along with further mathematics. The quantum and condensed matter elements of the core are completed in the third year.

The Theoretical Physics degree does include practical work including computing and mathematics.

The third year also includes optional modules to develop further and enhance knowledge of a range of physics topics.

This programme is offered both as a three-year BSc and a four-year MSci, with common structures and subjects for the first two years. However, the additional fourth year of the MSci programme allows for a greater depth of study and we recommend you apply for an MSci initially, as this keeps more options open.

Upon successful completion of 360 credits, you will be awarded a BSc (Hons) in Theoretical Physics.

Please note that the list of modules given here is indicative. This information is published a long time in advance of enrolment and module content and availability is subject to change.

YEAR ONE

Compulsory module(s)

// Year 1: All first year modules are compulsory – 120 credits at Level 4 in total
// PHAS0004 Atoms, Stars and the Universe (Level 4) 15 credits
// PHAS0005 Waves, Optics and Acoustics (Level 4) 15 credits
// PHAS0006 Thermal Physics and the Properties of Matter (Level 4) 15 credits
// PHAS0007 Practical Physics and Computing 1 (Level 4) 15 credits
// PHAS0002 Mathematical Methods I (Level 4) 15 credits
// PHAS0009 Mathematical Methods II (Level 4) 15 credits
// PHAS0012 Computing for Mathematical Physics (Level 4) 15 credits
// PHAS0017 Developing Effective Communications 1 (non-credit, but will appear in student's transcript)

Optional modules

// All first-year modules are compulsory.
YEAR TWO

**Compulsory module(s)**
- Year 2: All second year modules are compulsory – 120 credits at Level 5 in total
- PHAS0021 Electricity and Magnetism (Level 5) 15 credits
- PHAS0022 Quantum Physics (Level 5) 15 credits
- PHAS0023 Atomic & Molecular Physics (Level 5) 15 credits
- PHAS0024 Statistical Physics of Matter (Level 5) 15 credits
- PHAS0026 Mathematical Methods for Theoretical Physics (Level 5) 15 credits
- PHAS0030 Further Practical Mathematics and Computing (Level 5) 15 credits
- PHAS0024 Statistical Physics of Matter (Level 5) 15 credits
- PHAS0025 Mathematical Methods III (Level 5) 15 credits
- MATH0043 Mathematics for Physics and Astronomy (Level 5) 15 credits
- PHAS0035 Developing Effective Communications 2 (non-credit, but will appear in student's transcript)

**Optional modules**
- All second-year modules are compulsory.

FINAL YEAR

**Compulsory module(s)**
- Year 3: 120 credits in total (at least 90 credits at Level 6)
  - Compulsory Modules (75 credits)
    - PHAS0038 Electromagnetic Theory (Level 6) 15 credits
    - PHAS0040 Nuclear and Particle Physics (Level 6) 15 credits
    - PHAS0041 Solid State Physics (Level 6) 15 credits
    - PHAS0042 Quantum Mechanics (Level 6) 15 credits
    - PHAS0052 Physics Group Project (Level 6) 15 credits

**Optional modules**
- You will select 45 credits in total from options that may include the following (choices must be approved by your Programme Tutor)
  - GEOL0022 Physics of Oceans, Ice Sheets and Climate (Level 6) 15 credits
  - PHAS0037 Physical Cosmology (IoE) (Level 6) 15 credits
  - MATH0025 Mathematics for General Relativity (Level 6) 15 credits
  - PHAS0039 Physics Education (IoE) (Level 6) 15 credits
  - PHAS0049 Theory of Dynamical Systems (Level 6) 15 credits
  - PHAS0050 Energy and Climate (Level 6) 15 credits
  - PHAS0053 Lasers and Modern Optics (Level 6) 15 credits
  - PHAS0048 Project (Level 6) 30 credits

**Your learning**

Teaching is delivered through lectures, laboratory (and as appropriate, observatory) practical sessions, and supervised problem-solving tutorials. These tutorials are designed to deal with lecture-based questions, enlarge on topics addressed in lectures, and allow clarification and in-depth discussion of new concepts.

**Assessment**

Assessment will normally involve end-of-year examinations, and an element of assessed coursework. Practical work you will be continuously assessed.

**Accessibility**

Details of the accessibility of UCL buildings can be obtained from AccessAble. Further information can also be obtained from the UCL Student Support & Wellbeing team.

**Your career**

Your scientific training will equip you with an understanding of mathematics, and of physical principles and techniques, as well as transferable skills in analysis, rational argument and innovative problem-solving. Surveys by the Institute of Physics indicate that physicists' versatility is welcomed by a wider range of professions than any other subject.

Around half our graduates choose to pursue further study for an MSc or PhD. A PhD opens up the possibility of an academic or research career in a university or research institute. Alternatively, like many of our graduates, you may consider employment in research, design, development, computing, finance, marketing and teaching, among others.
Entry requirements

A LEVELS

GCSE: English Language and Mathematics at grade C or 5. For UK-based students, a grade C or 5 or equivalent in a foreign language (other than Ancient Greek, Biblical Hebrew or Latin) is required. UCL provides opportunities to meet the foreign language requirement following enrolment, further details at: www.ucl.ac.uk/ug-reqs.

GCSE: English Language and Mathematics at grade C or 5. For UK-based students, a grade C or 5 or equivalent in a foreign language (other than Ancient Greek, Biblical Hebrew or Latin) is required. UCL provides opportunities to meet the foreign language requirement following enrolment, further details at: www.ucl.ac.uk/ug-reqs.

IB DIPLOMA
Standard Offer: 39 points. A total of 19 points in three higher level subjects including grade 7, 6 in Mathematics and Physics, in any order, with no score below 5.

Contextual Offer: 38 points. A total of 18 points in three higher level subjects including grade 7, 6 in Mathematics and Physics, in any order, with no score below 5.

CONTEXTUAL OFFERS – ACCESS UCL SCHEME
As part of our commitment to increasing participation from underrepresented groups, students may be eligible for a contextual offer as part of the Access UCL scheme. For more information see www.ucl.ac.uk/prospectus.

OTHER QUALIFICATIONS
UCL considers a wide range of UK and international qualifications for entry into its undergraduate programmes. Full details are given at: www.ucl.ac.uk/otherquals.

UNDERGRADUATE PREPARATORY CERTIFICATES (International foundation courses)
UCL Undergraduate Preparatory Certificates (UPCs) are intensive one-year foundation courses for international students of high academic potential who are aiming to gain access to undergraduate degree programmes at UCL and other top UK universities.

Typical UPC students will be high achievers in a 12-year school system which does not meet the standard required for direct entry to UCL.

For more information see: www.ucl.ac.uk/upc.

TUITION FEES
The fees indicated are for undergraduate entry in the 2021/22 academic year. The UK fees shown are for the first year of the programme at UCL only. Fees for future years may be subject to an inflationary increase. The Overseas fees shown are the fees that will be charged to 2021/22 entrants for each year of study on the programme, unless otherwise indicated below.

// UK & EU: £9,250 (2021/22)
// Overseas: £31,200 (2021/22)

Full details of UCL’s tuition fees, tuition fee policy and potential increases to fees can be found on the UCL Students website.

ADDITIONAL COSTS
You will require the approved model of calculator for use in exams. Currently this is either the Casio FX-85GT X or Casio FX-83GT X, which can be purchased for around £11 - £15. For details please see the UCL examinations guide. You may also be required to purchase books, stationery, printing, thesis binding and photocopying.

A guide including rough estimates for these and other living expenses is included on the UCL Fees and funding pages. If you are concerned by potential additional costs for books, equipment, etc., please get in touch with the relevant departmental contact (details given on this page).

FUNDING
Various funding options are available, including student loans, scholarships and bursaries. UK students whose household income falls below a certain level may also be eligible for a non-repayable bursary or for certain scholarships. Please see the Fees and funding pages for more details.
