

## Engineering Challenges (ENGF0001)

### Description

This module is intended to give the students an opportunity to put their learning into practice by way of an interdisciplinary, project based learning and design focus environment.

The learning within this module has been structured around two major 5-week design projects known as the Challenges aimed at introducing students to discipline specific research and global grand challenges.

The two Challenge projects provide direct opportunities for students to integrate knowledge and skills developed in other modules such as experimental methods, coding, modelling, prototyping and simulation as well as critical thinking, problem solving, effective teamworking, self-directed learning, technical writing and communication.

### Key information

<b>Year</b>	2018/19
<b>Credit value</b>	15 (150 study hours)
<b>Delivery</b>	UG L4, Campus-based
<b>Reading List</b>	<a href="#">View on UCL website</a>
<b>Tutor</b>	<a href="#">Dr Kate Roach</a>
<b>Term</b>	Term 1
<b>Timetable</b>	<a href="#">View on UCL website</a>

### Assessment

■ Practical examination (departmentally managed): 100%
