Mathematics

Algebra 3: Further Linear Algebra (MATH0014)

Description
The aim of this course is to complete the study of the basic concepts of linear algebra started in the first year. The topics covered have applicability in many areas of mathematics. The ring theory of polynomials over a field is studied. The theory of the diagonalization of matrices is completed and Jordan normal form is introduced. The theory of quadratic forms and orthogonal diagonalization are introduced.

Key information
- Year: 2019/20
- Credit value: 15 (150 study hours)
- Delivery: UG L5, Campus-based
- Reading List: View on UCL website
- Tutor: Mr Isidoros Strouthos
- Term: Term 1
- Timetable: View on UCL website

Assessment
- Written examination (main exam period): 90%
- Coursework: 10%
